Medical Astrology – Kidney Diseases

Position of Kidneys with respect to other organs

Liver to Kidney Connection

Kidney Diseases

- The organs that specialize in excretion are the kidneys. The liver converts the amino acids through enzymes into a nitro based waste called urea which is carried by the blood to the kidney for excretion.
- Blood tolerates 0.55 ppm of uric acid in kids, 0.6 ppm in woman and 0.7 ppm in men.
- High uric acid level generates stones in joints, producing Gout.
- Bile from the liver enters the duodenum via the common bile duct. About a one pint a day of this fluid is produced, some of which is stored in concentrated form in the gall bladder, a pear shaped organs lying under the right lobe of liver. Bile is an alkaline fluid rich in cholesterol.

Gall Bladder Diseases

- Even if the liver bile production system is working normally, things can go wrong in the Gall Bladder. Most notorious of gall bladder problem is gall stone.
- 75% of stones contain 50-98% cholesterol. The remaining 25% of stones contain bilirubinate (pigment stones) which are either black or brown in colour.
- While in some cases the cause of pigment stones is hemolysis infection in the biliary tree.
- Sun is the karaka for all diseases concerning bowels and Mercury rules over the diseases of Gall Bladder. The root causes of the diseases of gall bladder are to be judged from the sixth house.
- When Kanya Rasi (Virgo), sixth house (either from Lagna or Moon), lord of sixth house, Sun, Mercury are afflicted and by any way related with the disease inflicting house or planet, they produce diseases in Gall Bladder.
- Saturn is the karaka for all stones. When malefic Saturn afflict disease inflicting house or planet or makes some relation with them, it causes stone in the gall bladder.
- When the combinations for gall bladder diseases are heavily afflicted by malefics, Rahu, Saturn and Mars etc and ascendant be also afflicted, they give rise to cancer of bladder.
- When the lord of Lagna and Mars are posited together in 6*/8*/12* houses, one may suffer from Carbuncle, rheumatism & Gall Bladder stones.

Hemolysis or haemolysis, is the rupturing of red blood cells (erythrocytes) and the release of their contents (cytoplasm) into surrounding fluid (e.g. blood plasma).

Gallbladder problems often cause changes in bowel habits. Frequent, unexplained diarrhea can signal a chronic gallbladder disease. Light-colored or chalky stools may point to a problem with the bile ducts.

Patients suffering from gallbladder issues may notice darker than normal urine. Dark urine may indicate a bile duct block.

Gall Bladder and Biliary System

Kidney

- Each kidney weighs only a few grams but in spite of that they contain more than a million filter units called NEPHRONS which filter the blood.
- Blood is being continuously filtered by the kidneys and the waste matter from the blood is taken to the bladder in the form of urine.
- The main function of kidney is to regulate the water mineral and food content of the blood. The most common disease of the kidney is a stone in a kidney which sometimes occurs if the body does not take enough fluid.
- Calcium salts, uric acid are the basis of virtually all kidney stones.

Astrological combinations for Kidney Diseases
