Longevity

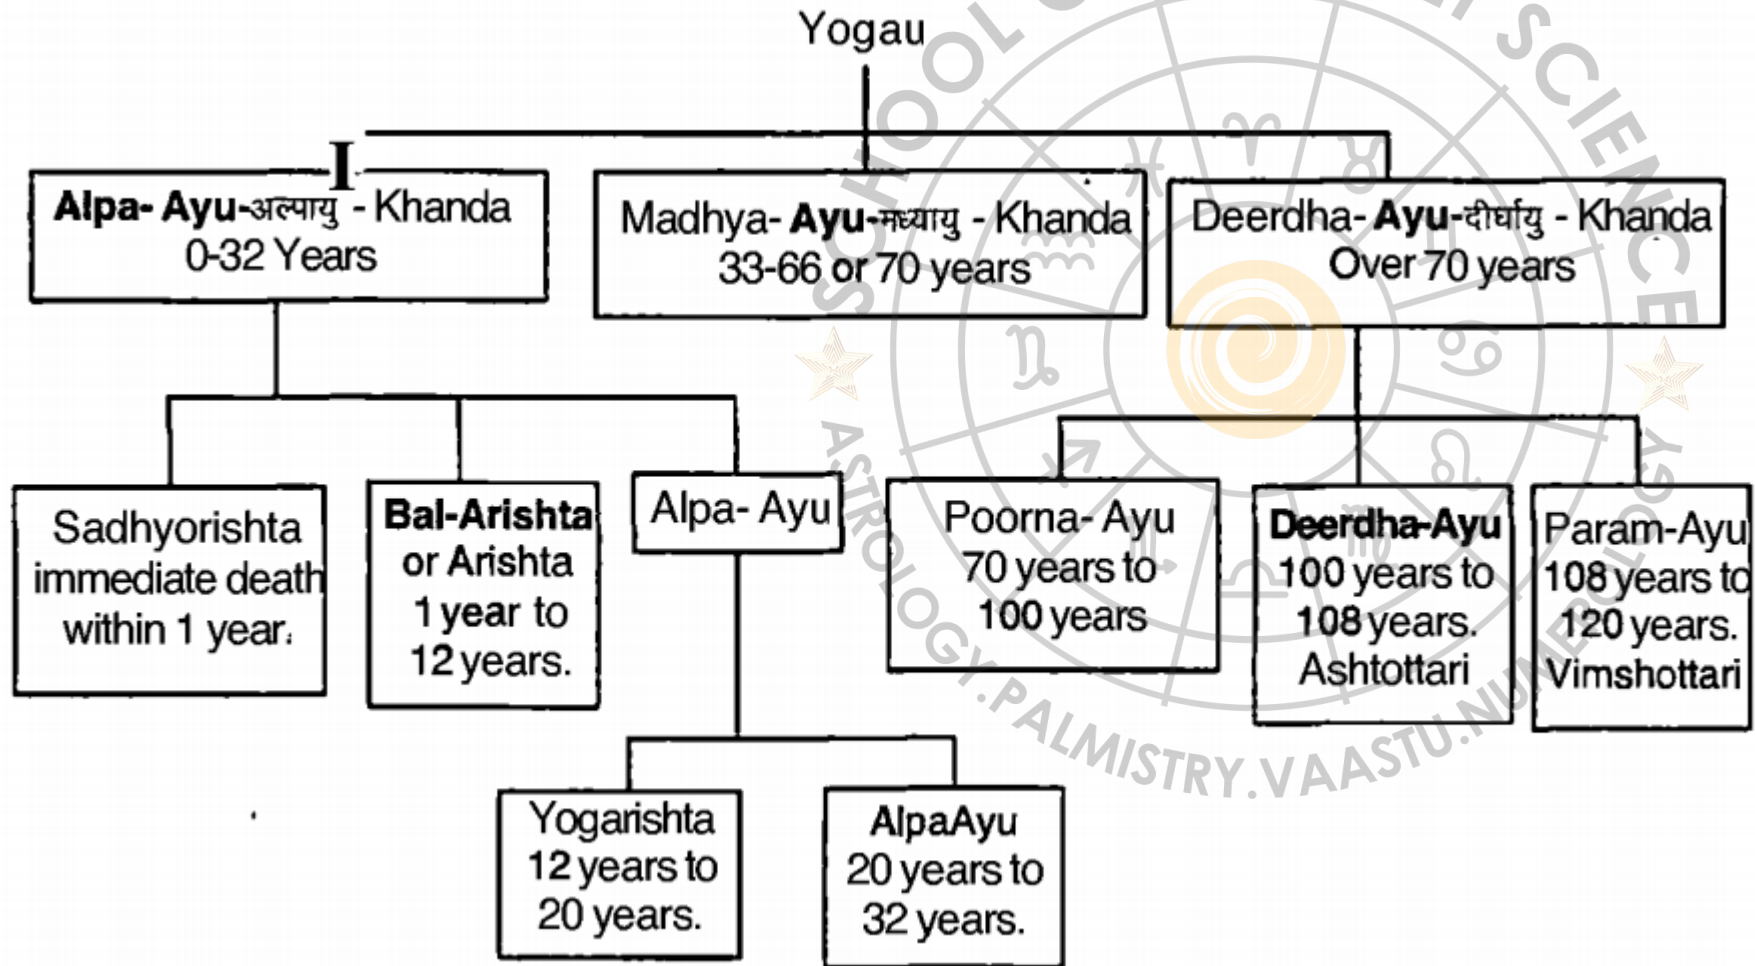

Disclaimer:

- An Astrologer can only give an Indication of what promise the future holds. Only Brahma, the creator, can say with certainty what will definitely happen.
- Matters like longevity cannot be decided by us mortals. They are in the hands of the supreme power and an Astrologer who wishes indulge in longevity determination, needs help of this super power to make the correct judgement.
- Ayu Nirnay (Longevity) is a very serious and a deep subject and it involves much more than just the mathematical calculation. Even after checking longevity by many methods, the Astrologer is almost forbidden to disclose the person's death to him. At the most he can give a very subtle hint.
- There are several methods of calculation of longevity, but there is no one method which gives perfect result. After calculating it by a number of methods, if similar Ayu is found, then it can be relied upon, to a certain extent.

Ayu Nirnay after 12

- Till a child is of twelve years of age his ayu nirnay should not be done.
- The first four years of his life are governed by the poorva karmas of his mother,
- the next four years are governed by the karmas of his father and
- the next four years are governed by his own karmas.
- Till twelve years, even prediction of his horoscope should not be done, because whatever the horoscope shows, can get altered because of these super imposing factors.
- Only after he has crossed this age, his Ayu Nirnay should be, done.

Ayu Khanda – Age slabs

Some Astrologers consider Balarishta up to 8 yrs and yogarishta from 8-20 yrs.

For Sadhyorishta, Balarishta and Deerdhayu over 100years, mathematical calcuation of Ayu is unnecessary.

Balarishta

Balarishta means some serious harm caused to a child up to twelve years of age.

The principles for determination of Balarishta:

1. **The Condition of Moon** : Moon is most important in childhood. Moon also represents the mother. So affliction to moon causes arishta to the child or his mother.
2. **Lagna and Lagna Lord** The importance of lagna is undisputed. If lagna and lagna lord are strong they can withstand affliction, but if they are weak they succumb to it.
3. **Eighth house and lord of Eighth house** is the house of ayu or death; so it should be protected by the aspect of benefics. Effect of malefics on the eighth house reduces longevity, but Saturn placed in 8th house promotes longevity, provided he is not retrograde.
4. **Direct Benefics in kendras** protect the child while malefics cause harm. Retrograde benefics cannot protect the child, while retrograde malefics are even worse.
5. **Dasha and Gochar** Adverse dasha and gochar are also responsible for arishta.

Most of the classical combinations for arishta are based on these five principles.

Classical Combinations for Balarishta 1/2

1. If moon is placed in the sixth eighth or twelfth house from lagna and is aspected by malefics it causes arishta.
2. If malefics are placed with moon or are in kendra from moon, it is harmful for the child.
3. If moon is in lagna in Papa kartari unaspected by benefics while malefics are in the seventh and eighth house. The child dies with the mother. This is a very powerful and dreadful combination.
4. If birth Lagna falls in - Nigada Drekkna (1°-10° Capricorn) or Pakshi Drekkna (11°-20° Gemini) or Sarpa Drekkna (21°-30° Pisces) and if it is associated with malefics without any association of benefics, there could be Balarishta.
5. **Vajra Mushti Yoga** If Cancer or Scorpio rashi is in lagna and all the malefics are placed in the eastern half (10th house to 4th house) and all the benefics are in the western half (fourth to 10th house) the child is bereft of longevity.
6. If retrograde Saturn is placed in the eighth house, in the rashi of Mars and is aspected by a strong Mars, it gives two years longevity to the child.

Classical Combinations for Balarishta 2/2

7. If birth is at solar or lunar eclipse when Sun and Moon are close to Rahu or Ketu and Saturn and Mars aspect the Lagna,
8. If Saturn Mars and Sun placed in 6th or 8th house, it leads to death within one month. It can also mean serious illness.
9. If birth is at sunrise or sunset (Twilight) in Moon's hora, or in Gandanta (Junction points of Pisces -Aries, Cancer-Leo, and Scorpio and Sagittarius), with Moon and malefics placed in kendras, it results in death of the child.
10. If birth is during an eclipse, moon is associated with malefics in lagna, and Mars is in eighth house, the child dies with his mother because of a weapon.

Arishta to the mother

1. Moon aspected by three malefics indicate death of the mother, but if benefics also aspect moon, they give protection.
2. If Malefics are in 5th or 9th house from a weak moon, the mother dies within six months of the child's birth.
3. Saturn in 10th house, Moon in the 6th house and Mars in the 7th house results in the death of mother and child.

Arishta to Father

1. If Sun in Papakartari, or is in association with malefics, and malefics are placed in the seventh from Sun, it leads to the death of father.
2. Sun in Navamsa of Mars aspected by Saturn -the father dies before the birth of the child, or leaves his family.
3. Saturn in lagna, Mars in Seventh house and Moon in Sixth house -death of father.

The classics use very strong language. In reality it may not turn out to be as bad. Death can also mean ill health or separation from parents.

When Arishta is seen, cancellation for Arishta- Arishta bhanga must be looked for. If Arishta bhanga is present then the arishta may get reduced or averted

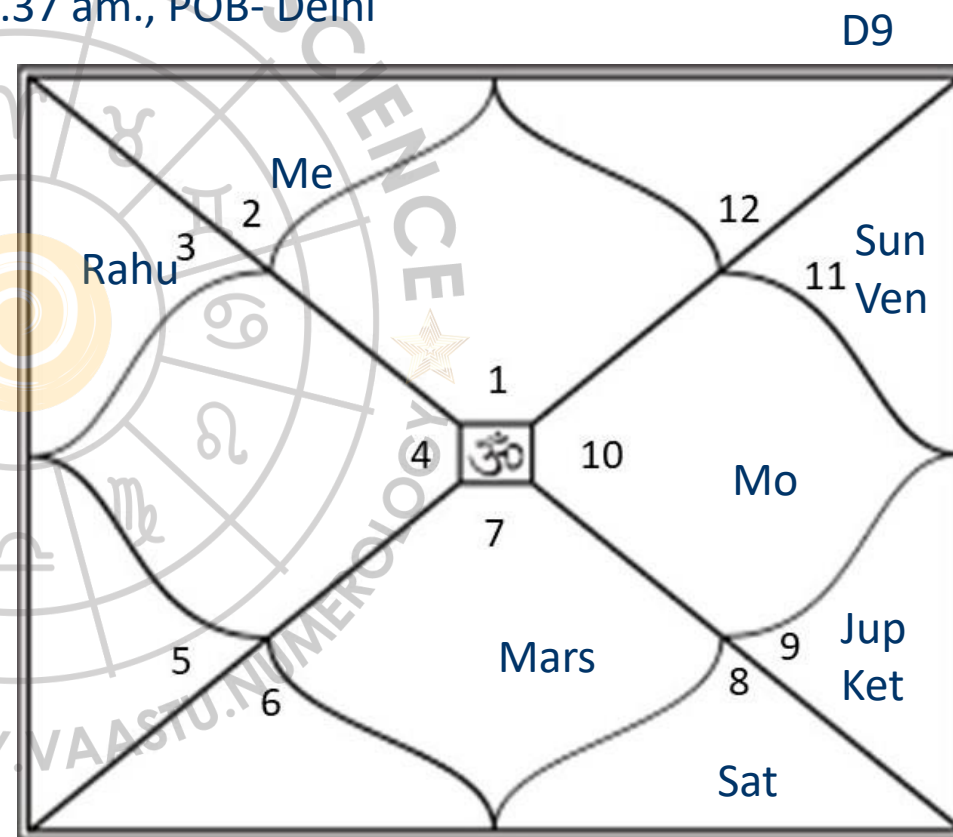

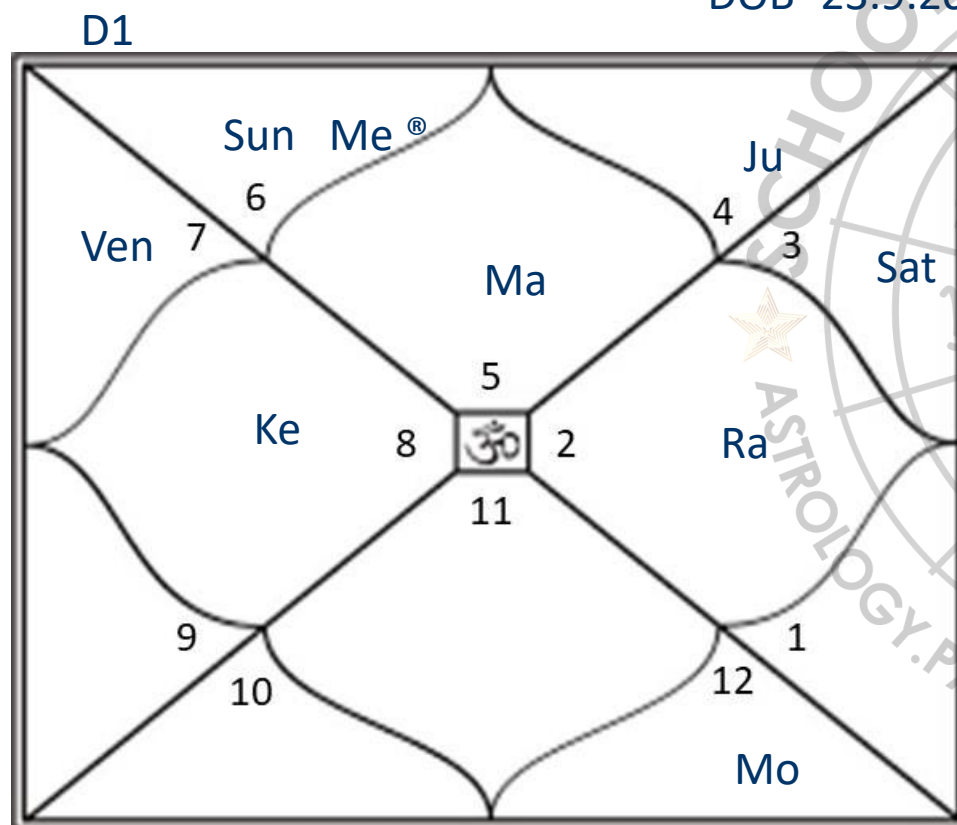

- 
- If Arishta is seen in the child's horoscope, One must examine the Navamsa, Drekkna, Dwadasamsa and Trimsamsa. If there is improvement in the vargas then it reduces the danger, but if Arishta is seen repeated in the vargas then there is serious cause for worry

Chart 1 Balrishta

DOB- 23.9.2002, TOB- 3.37 am., POB- Delhi

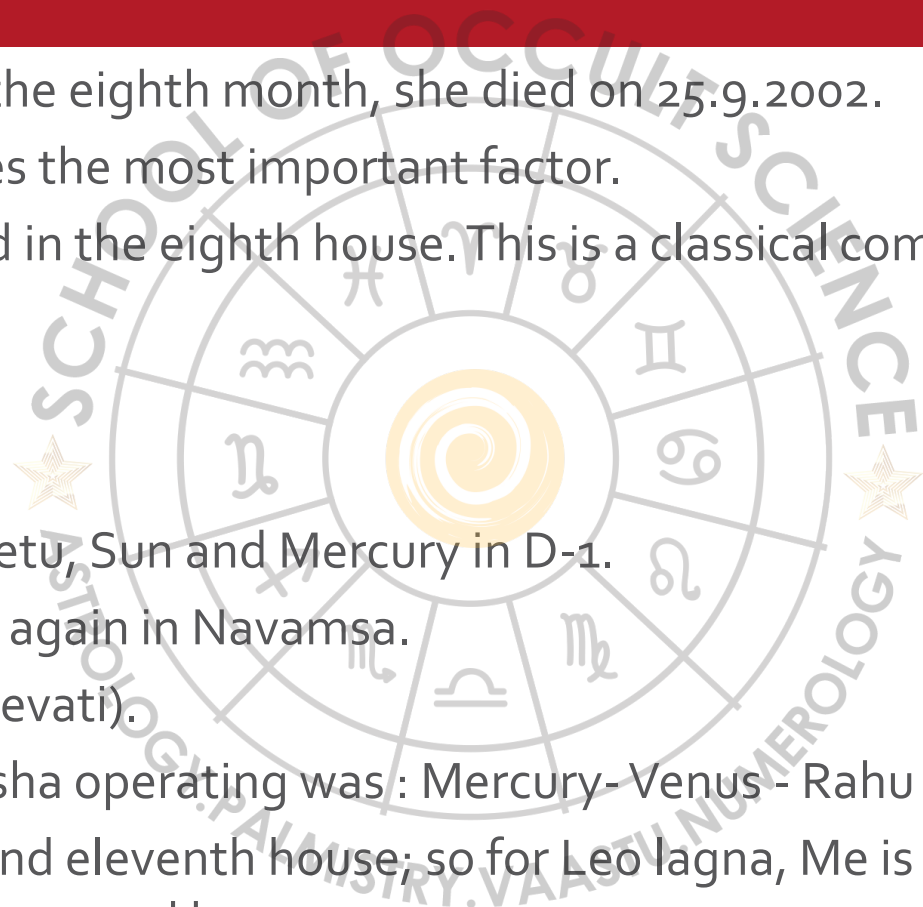

Lag : 1°39' Sun : 5°50' Mo : 20°26' Mars: 21°35' Mer: 15°40' Jup: 16°55' Ve : 16°9' Sa: 4°56' Ra:17°25'

Dasha at birth Mercury-Venus-Rahu-Moon, till 27.9.2002.

Analysis Chart 1

- The baby was born premature in the eighth month, she died on 25.9.2002.
- In a balarishta case moon becomes the most important factor.
- In this case moon is badly afflicted in the eighth house. This is a classical combination for balarishta.
- Moon is the twelfth lord himself.
- He is in Sarpa dreshkone.
- He is in Kemadrum yoga.
- He is aspected by Saturn, Mars, Ketu, Sun and Mercury in D-1.
- He is afflicted by Saturn and Mars again in Navamsa.
- He is in Gandamoola nakshatra (Revati).
- Vimshottari dasha at birth the dasha operating was : Mercury - Venus - Rahu - Moon
- **MDL**- Mercury is the lord of 2nd and eleventh house; so for Leo lagna, Me is Marak. In addition to this he is placed in the maraka bhava- the second house.
- **ADL**- Venus is the 3rd and 10th lord in D-1 and the 2nd and 7th lord in D-9. In D-1 he is placed in the eighth house from Moon, and in Navamsa, he is placed in the 2nd house from Moon. In this way, the ADL also has marak properties.

Analysis Chart 1 cont...

- **PDL** is Rahu, who is placed in the rashi of Venus. So he tends to behave like Venus. Rahu-Venus dasha is also a tricky dasha, which is capable of causing such harm. In addition to this Rahu and Venus are in 6/8 axis (Shadashtak) from each other. So the pratyantar dasha is also dangerous.
- **SDL**- Sookshmadasha lord is the afflicted (~) moon himself. In this way we find that both the promise and dasha are quite adverse.

Analysis Chart 1 cont.

- However there is some saving element in the horoscope.
- Yogakarak Mars is in lagna in Pushkar Amsa (the life giving degree) in D-1.
- In D-9 he becomes the Lagna lord who is aspecting the lagna.
- Moon and the eighth house are aspected by an exalted Jupiter in D-1.
- In D-9 Jupiter is aspecting the lagna. Moon is strong in pakshabala.

In spite of this the child could not be saved. Even the saving element had its own weaknesses.

Jupiter is the eighth lord

Mars is 22nd Drekkana lord or kharesh.

Arishtabhanga (Cancellation of Arishta) 1/2

The association of strong benefics protects the child.

1. Predominance of benefic influence on Lagna, Lagna lord, Moon or Moon's dispositor, or on Kendras cancels Balarishta.
2. If a strong dignified (in uchha or svarashi etc.) Jupiter in Cancer, Sagittarius or Pisces rashis is placed in Lagna it gives strong protection against evils. In such a position he is supposed to overcome one Lakh doshas. In a similar condition, Venus overcomes ten thousand doshas and Mercury in similar situation cancels one thousand doshas.
3. Strong lagna lord in kendras, protects and supports the child, it promotes longevity.
4. Strong lagna lord in kendras aspected by benefics, unaspected by malefics destroys affliction and promotes longevity.
5. If moon is placed in sixth eighth or twelfth house, under the aspect of malefics and if the birth is at night time in shukla paksha (From sunset to sunrise) or in day time (sun rise to sunset) in Krishna Paksha, then instead of killing, this Moon protects the child like Ma Bhagwati. (A very strong combination)
6. Rahu in third sixth and eleventh house aspected by a benefic removes affliction instantaneously. If Aries, Taurus or Cancer are in Lagna, with Rahu placed in it, then also, any affliction gets neutralised.

Arishtabhanga (Cancellation of Arishta) 2/2

7. If Sun is placed in the twelfth house for Libra lagna it gives an ayu of 100 years (a very strong combination) 100 years means a long life- poornayu.
8. If moon is in sixth or eighth house but in Drekkana of benefics- then it cancels Arishta.
9. Full moon aspected by all planets cancels arishta.
10. Benefics in sixth seventh and eighth house from lagna or Moon, unassociated with malefics provide strong protection against Arishta. (Chandra or Lagna Adhiyoga).
11. Jupiter and Venus in kendras destroy evils.
12. If lagna is strong and the benefics are also strong while the malefics are weak, the child is protected from danger.
13. If full moon is aspected by Venus, who is in a friendly navamsa, it destroys evil.
14. Strong good Rajayogas in the horoscope also promote longevity.

Jaimini Ayurdaya

This is the most popular method of longevity assessment. It helps us to work out the Ayukhanda of the person up to 80% accuracy. The life-span of the person is considered to be of 100 years.

If hundred years are divided into three sections, each section becomes of 33 years.

Alpa-Ayu - 0 to 33 years

Madhya-Ayu - 33 to 66 years

Poorna-Ayu- 66 to 100 years

Jaimini classification of life span

To decide the Ayu khanda (Life Span) of the person, three sets of factors are considered.

First Set : Lagna Lord and Eighth house Lord

Second Set : Lagna and Moon

Third Set : Lagna and Hora Lagna

See in which types of Signs these are placed - Moveable, Fixed or Dual Signs.

Alpa-Ayu (Short Span):

1. If all the three sets are completely in Fixed Signs then Alpa-Ayu is indicated OR
2. If one part of each set is in Moveable Sign and the other is in Dual Sign then also it shows Alpa-Ayu.

MadhyaAyu (Middle Span):

1. If all the three sets are fully in Dual Sign then Madhya- Ayu is indicated OR
2. If one part of each set is in Moveable Sign and the other is in Fixed Sign, then also it shows Madhaya ayu.

Poorna Ayu (Full span) :

1. If all the three sets are fully in Moveable Signs then Poorna Ayu is indicated OR
2. If one part of each set is in Dual Sign and the other is in Fixed Sign then also it shows Poorna Ayu.

Table for Jaimini Method of Longevity

M : Moveable	F: Fixed	D: Dual			
Consider Three Sets			Alpa-Ayu (0-33yrs)	Madhya-Ayu (33-66yrs)	Poorna-Ayu(66-100yrs)
Lagna Lord	F	One of them D		One of them M	One of them
Eighth Lord	F	M and other D D		M and other FM	D and other F
Conclusion		F		D	M
Lagna	F	One of them D		One of them M	One of them
Moon	F	M and other D D		M and other FM	D and other F
Conclusion		F		D	M
Lagna	F	One of them D		One of them M	One of them
Hora Lagna	F	M and other D D		M and other FM	D and other F
Conclusion		F		D	M

Alp Ayu : At least 2 Fixed Signs

Madhya Ayu : At least 2 Dual Signs

Poorna Ayu : At least 2 Moveable Signs

Analysis of Jaimini method of Longevity

- At least 2 sets must show the same Ayu to be accepted .
- If all the 3 sets show different ayus then, whatever the last set (Lagna and Hora lagna) shows is the final.
- If Moon is in lagna or in the seventh house accept the ayu indicated by lagna and Moon set.
- Some astrologers are of the opinion that Moon and Ayushkarak Saturn should be considered instead of Moon and Lagna.
- The ayu will depend on **Haran and Bharan Sanskar**, which has to be carried out on the ayu which has been determined by this method.

Calculation of Hora Lagna

1. Parashar Hora Lagna

Step -I

- Note the local Sunrise on the date of birth.
- Find the difference between local sunrise and local birth time in hours and minutes. (Both these can also be taken in Indian standard time- I.S.T.)

Step – II

- The hours become the completed rashis.
- The minutes divided by 2 give the degrees.
- Eg- If the difference between sunrise and Time of Birth is 10 hrs. 20 mins. Then completed signs are 10s- Capricorn. $20/2 = 10$ are the degrees. = Aquarius 10° or $10^s 10^{\circ}$

Step III

- If the Ascendant is odd (Visham), then add the Signs and degrees to the Longitude of Sun.
- If the Ascendant is even (Sarna), then add the signs and degrees to the Longitude of the Ascendant (Lagna).
- The Resultant is Parashar Hora Lagna.

Jaimini Hora Lagna

II. Vradhkarika Hora Lagna or Jaimini Hora Lagna (80% Accuracy)

Step -I , Note whether it is day birth or night birth. (From Sunrise to Sunset is day birth and from Sunset to Sunrise is night birth.)

Dinman for day birth / Ratriman for night birth

12

= 1 Hora or Q-1 (In ghati pala)

Step -II Find Ishtakala Ishtakala is the difference between sunrise and the Time of birth in ghati pala.]

Now $\frac{\text{Ishtakala}}{\text{Hora(Q.I.)}}$
= Q.II.

Step- III

Add 1 to QII (Q.II+ 1) = X^s Y^o

This is the value to be counted from Lagna .

If the lagna is even, the count the full value (x•) the Indirect way. (Diff between lagna and hora lagna)

If the lagna is odd then count the full value (x•) the Direct way. (add hora lagan to lagna)

The rashi derived in this manner will be **Jaimini Hora Lagna**.

Note : Hours and minutes can be converted into Ghati pala by multiplying them by 2.5. Hrs & Mins x 2.5 = Ghati Pala.

Kakshya Haran (Reduction) – Haran Sanskar

Kakshya HRAS (Reduction)

1. If Saturn is Lagna lord or eighth lord and he is neither exalted nor in his own house and is not aspected by benefics then there is reduction of 1 kakshya.
2. If eighth lord from Lagna or from Seventh house becomes atmakarak or conjoins with A.K. then there is reduction of one kakshya.
3. When lagna or seventh house are in Papa kartari (hemmed between two malefics) or if malefics are in trines (1-5-9) from them, there is loss of 1 kakshya.
4. If A.K. is malefic, and is debilitated or conjoined with malefics, there is loss of 1 kakshya.
5. When the A.K. or Seventh therefrom has malefics or if either of them are in Papakartari or if malefics are in trines from either of them, then there is loss of a kakshya.

Note -1 Kakshya is one level of longevity. The three kakshyas are Alpa- Madhya- Poornaayu.

Kakshya Vridhi (Addition) – Bharan Sanskar

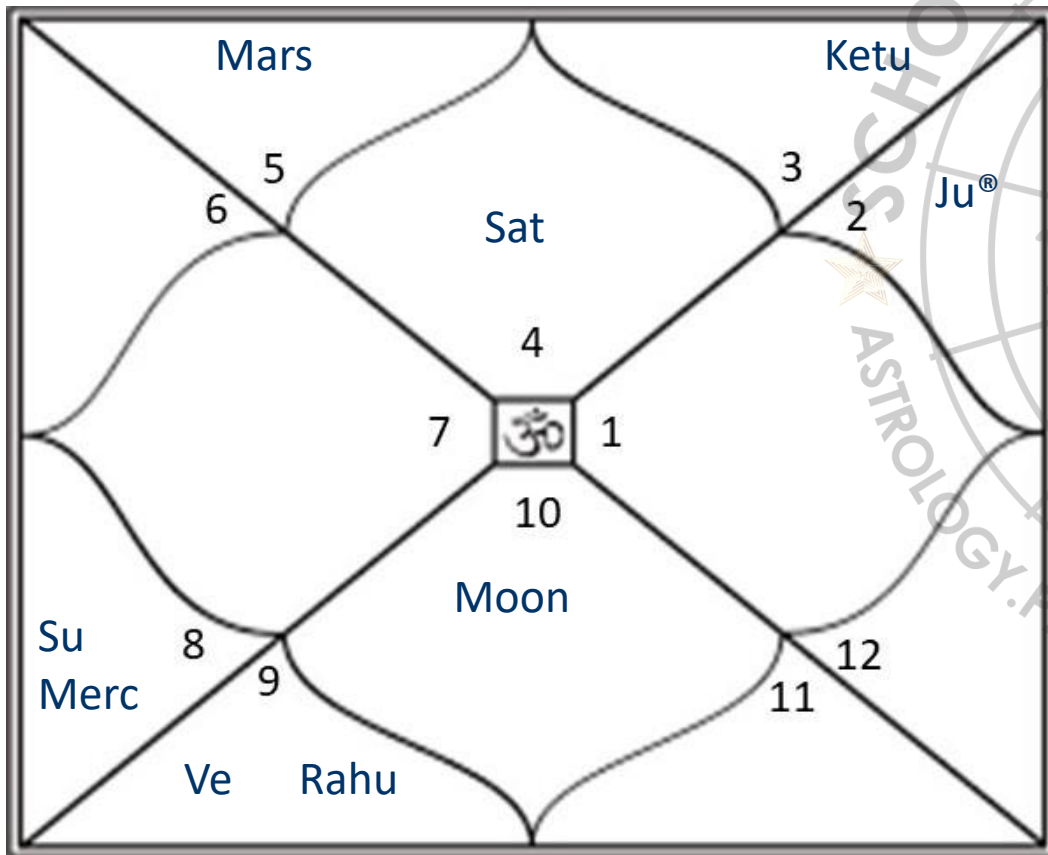

Kakshya Vridhi (Addition)

1. If A.K. is exalted or conjoined with benefic there is gain of 1 kakshya.
2. When A.K. or seventh from it has benefics, or has benefics in Trikonas, there is gain of a 1 kakshya.
3. If lagna or seventh house is in Shubha kartari or has benefics in trines from it, there is gain of 1 kakshya.

Example 1

D1

Indira Gandhi DOB : 19th Nov 1917; 23:11 hrs Allahabad
Sun rise : 6h 23m 42s; Sunset: 17h 12m 3s;

Lag : 27°56'
Mer: 13°14'
Ra: 9°12'

Sun : 4°07'
Jup: 15°

Mo : 5°37'
Ve : 21°

Mars: 16°22'
Sa: 21°47'

Calculation of Parashar Hora Lagna for Indira Gandhi

Parashar Hora Lagna

Step I

TOB : 23h-11 m-00 ; Sunrise - 6h'-23m-42^s.

Difference : = 16h-47m-18^s.

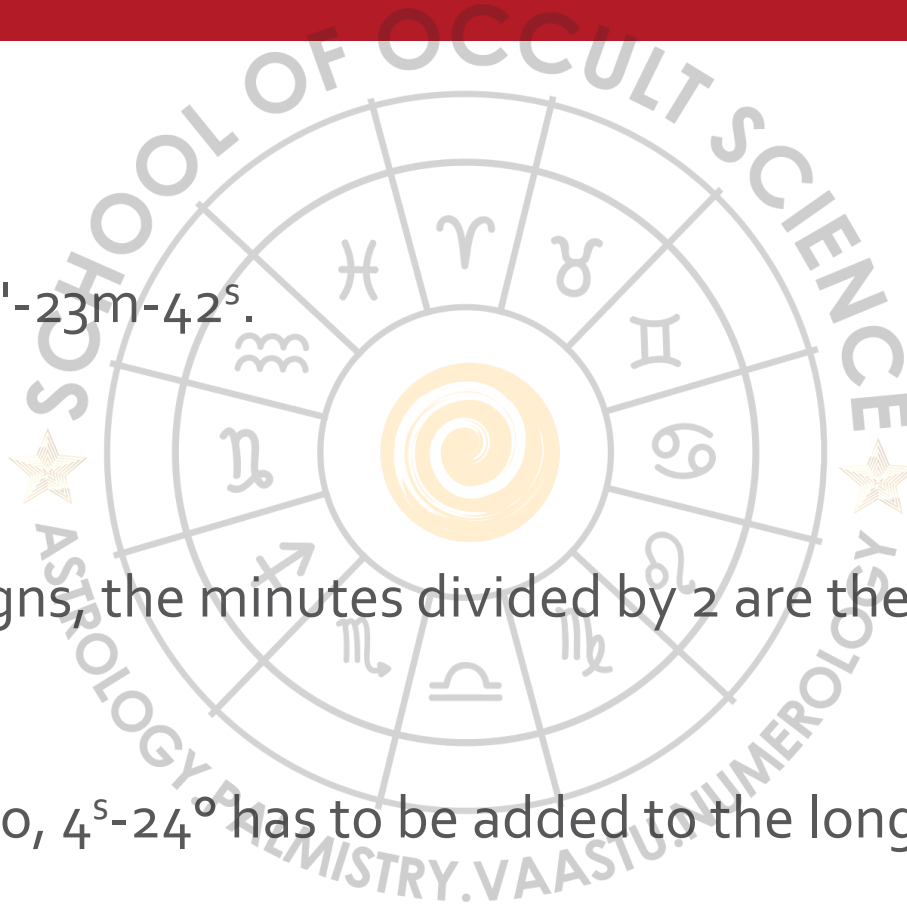

Step II

The hours are the completed Signs, the minutes divided by 2 are the degrees. = 4^s-24^o.

Step III

The Signs in lagna is even Sign so, 4^s-24^o has to be added to the longitude of Lagna, to obtain the hora lagna.

Lagna = ' 3s 27° 56' + 4s 24° 00' = 8s 21° 56' Parashar Hora lagna is Dhanu 21 °56'.

Calculation of Jaimini Hora Lagna for Indira Gandhi

Step I

It is night birth. So, Ratriman

$$\frac{12}{24} = 1 \text{ Hora or Ql..}$$

Ratriman =

24.00.00 hrs - Midnight

17.12.03 hrs - Sunset

= 6h 47m 57sec

+ 6. 24. 00 hrs Sunrise (Next day)

= 13h 11m 57sec X 2.5 = 32gh - 59 pala - 53 vipal

= 33 ghati (rounded off)

Q1 or 1 Hora = 33 ghati

12

= 2.75ghati

Step II

Find Ishtakala in Ghati pala.

23h·11 m. 00^s -T.O. B

- 6-23-42 - Sunrise

= 16h- 47m 18s

X 2.5 = 41 gh- 58 pala- 06 vipal

= 41.97 ghati

Now Ishtakala

Hora (Q.1)

= 41.97 gh.

=15.26

=Q2

2.75

Step III

$$Q2 + 1 = 15.26 + 1 = 16^s.26^o = 4^s 26^o$$

Since the lagna is even, count the full value (x•) the

Indirect way i.e. 4^s 26° - 3^s 27° 56' (Lagna)

= 0^s 29° 38'

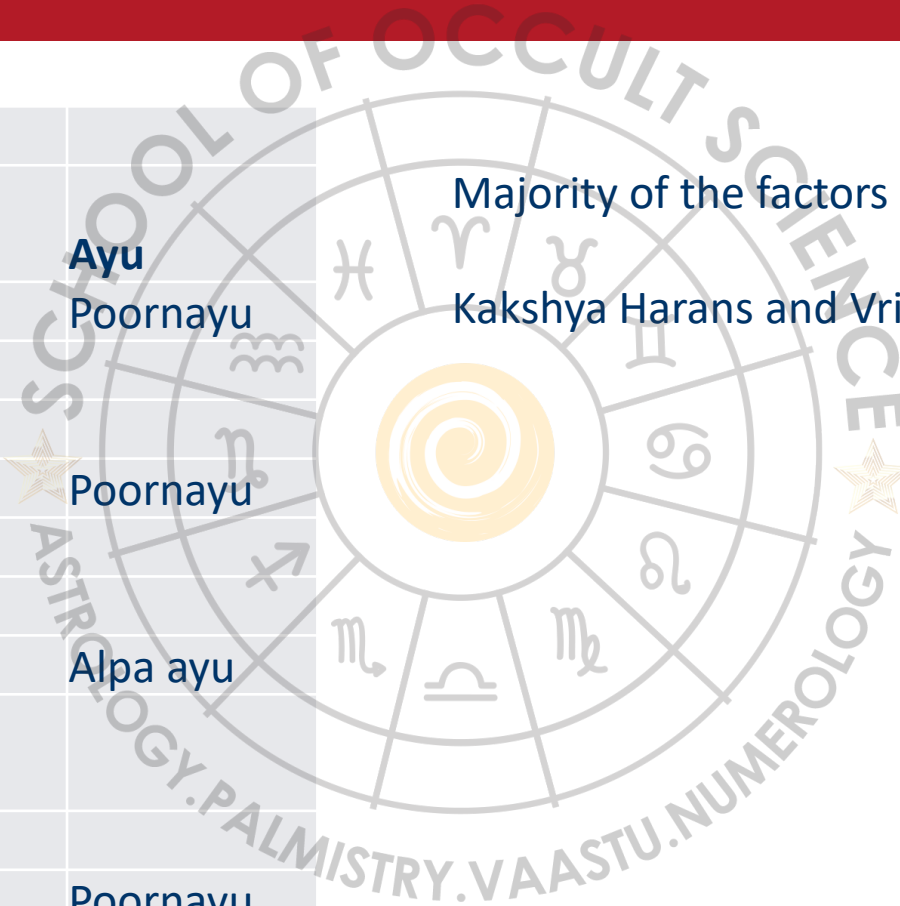

The Jaimini Hora lagna will be Aries. 28

Ayu Khanda of Indira Gandhi by Jaimini Method

M : Moveable	F: Fixed	D: Dual	
Consider Three Sets	Placed In	Sign	Ayu
Lagna Lord	Capricorn	M	Poornayu
Eighth Lord	Cancer	M	
Lagna	Cancer	M	Poornayu
Moon	Capricorn	M	
Lagna	Cancer	M	Alpa ayu
Hora Lagna (Parashar)	Sagittarius	D	
Lagna	Cancer	M	Poornayu
Hora Lagna (Jaimini)	Aries	M	

Majority of the factors indicate Poornayu.

Kakshya Harans and Vridhi have to be applied next.

Hras and Vridhi

Hras Ayu

1. Saturn is the eighth lord from lagna and he is the Atmakarak, so there is loss of a Kakshya.
2. Lagna is in Papakartari so there is loss of a kakshya.

Vridhi

1. Seventh house from Atmakarak has benefic Moon, so there is gain of a kaksha. Since a kakshya has been lost twice and it has been gained once. We can take the longevity to be Madhya-Ayu.
2. Mrs. Indira Gandhi was killed on 31st October 1984 when she was almost 67 years old.

Pindayu

- Pindayu is one of the best methods of determining the Longevity. If Sun is the strongest among the planets and the Lagna, Pindayu method is used. Strength of the planets and Lagna is normally seen from Grahabala and Bhavabala. If one has to judge quickly then 'Digbala' can be seen. Sun becomes digbali in the tenth house.
- Seven planets from Sun to Saturn give their fixed years of longevity if they are at their deep exaltation degrees and they give half this ayu at their deep debilitation degrees. If they are placed in between the two, then the ayu can be worked out according to ratio proportion.

Fixed Ayu (Full Term of the planet)

Planets	Yrs
Sun	19
Moon	25
Mars	15
Mercury	12
Jupiter	15
Venus	21
Saturn	20

Total 127 Yrs.

Steps in Pindayu Calculation

1. Convert the Nirayana Longitudes of the planets into degrees.

Eg.- If a planet is at 5° in Capricorn, then converted into degrees, it would be- $9^{\circ}5^{\circ}-00' = 9 \times 30 + 5 = 275^{\circ}$

2. Deduct the longitude of the deepest exaltation points of these planets from their converted degrees. This will give us their Arc of longevity.
3. If the result is less than 180° (6 Rashis) then deduct this figure from 360° .
4. If the result is more than 180° (6 Rashis), then take it as it is.
5. Calculate the years given by each planet.

Formula:-
$$\frac{\text{Full Term of the Planet} \times \text{Arc of Longevity}}{360^{\circ}} = \text{Ratio Proportion. (The years contributed by the planet)}$$

6. Add the years contributed by each planet.
7. Carry out the Haran Sanskar.
 - i. Chakrapath Haran
 - ii. Astangat Haran
 - iii. Shatru kshetra Haran
8. Add the ayu. Now carry out krurodaya Haran, (If a malefic planet is placed lagna)
9. Calculate LagnaAyu.
10. Add the Lagna Ayu to the previously calculated Ayu to get the Final Pindayu in savan yrs. (360 days)
11. Convert savan years into solar years (365 days).

Haran in Pindayu – 1/2

A. Chakra path Haran :

This reduction is done because of the placement of planets between seventh and twelfth house.

Maximum Haran is because of placement in the twelfth house.

Houses	Malefic Planet	Benefic Planet
	Losses	
12th	Fully	Loses Half
11th	Half	1/4
10th	1/3	1/6
9th	1/4	1/8
8th	1/5	1/10
7th	1/15	1/12

If both Benefic and Malefic planets are placed in these houses then

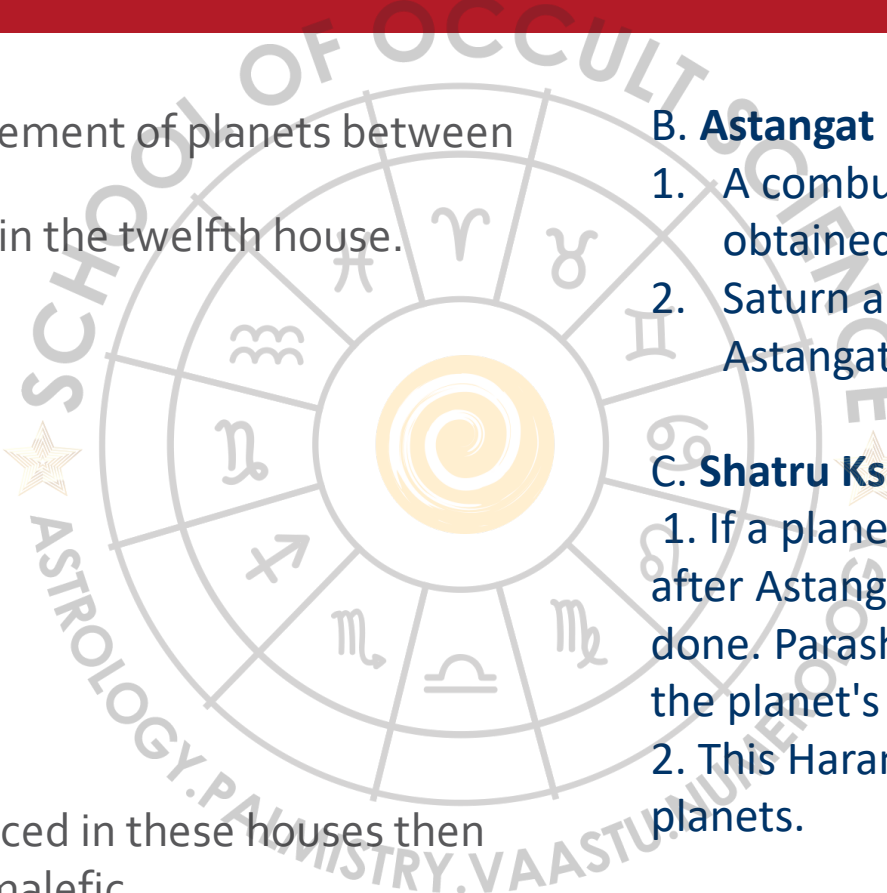

1. Mercury and Moon are not considered malefic.
2. Sun Mars and Saturn are malefics.
3. Rahu and Ketu are not taken into account. If More than one planet are placed together in these houses then the strongest out of them will lose, the rest will not lose

B. Astangat Haran :

1. A combust planet loses half of his ayu obtained after chakra path haran.
2. Saturn and Venus are exempted from Astangat Haran.

C. Shatru Kshetra Haran:

1. If a planet is placed in his inimical Sign, then after Astangat Haran, a further 1/3 reduction is done. Parashari natural friendship is seen from the planet's own side.
2. This Haran does not apply to Retrograde planets.

Haran in Pindayu – 2/2

Krurodaya Haran:

When one or more than one Krura grahas- namely Saturn Mars or Sun are placed in lagna, then Krurodaya Haran is carried out.

- i. Convert the lagna degrees (minus the Rashi) into minutes.
- ii. Multiply these minutes with the age provided by all planets, after shatru kshetra haran.
- iii. Divide the figure, thus obtained, by 21,600 (360° converted into minutes).
- iv. Reduce the quotient from the age provided by all the planets.

If a benefic aspects the lagna, deduct $\frac{1}{2}$ the quotient.

If a benefic planet is also placed in the lagna then:-

If the benefic is closer to the lagna degree - No Haran is carried out.

If the malefic is closer to the lagna degree, then deduct $\frac{1}{2}$ the quotient.

Pindayu for Indira Gandhi

Planet	Longitude - Deepest Exaltation degree	Arc of Long. (In Decimal)	Full Term of planet X <u>Arc of Longevity</u> 360	Years Contributed
1. Sun =7 ^s 4 ^m 7 ^s =214°7'	=214°07'-10°=204°7'	=204.12°	$\frac{19 \times 204.12}{360} = 10.773 \text{ yrs.}$	= 10.773 yrs.
2. Moon =9 ^s 5 ^m 37 ^s =275°37'	=275°37'-33°=242°37'	=242.62°	$\frac{25 \times 242.62}{360} = 16.848 \text{ yrs.}$	= 16.848 yrs.
3. Mars =4 ^s 16 ^m 22 ^s =136°22'+360°	=496°22'-298°=198°22'	=198.37°	$\frac{15 \times 198.37}{360} = 8.265 \text{ yrs.}$	= 8.265 yrs.
4. Mercury =7 ^s 13 ^m 14 ^s =223°14'	=223°14'-165°=58°14' The result is less than 180°, so correct it by deducting it from 360° 360°-58°14'=301°46'	=301.77°	$\frac{12 \times 301.77}{360} = 10.059 \text{ yrs.}$	= 10.059 yrs.
5. Jupiter =1 ^s 15 ^m =45°	=405°-95°=310° (45°+360°)	=310°	$\frac{15 \times 310}{360} = 12.916 \text{ yrs.}$	= 12.916 yrs.
6. Venus =8 ^s 21 ^m =261°	= 621°-357°=264° (261°+360°)	=264°	$\frac{21 \times 264}{360} = 15.4 \text{ yrs.}$	=15.4 yrs.
7. Saturn =3 ^s 21 ^m 47 ^s =111°47'	=471°47'-200°=271°47' (111°+360°)	=271.78°	$\frac{20 \times 271.78}{360} = 15.09 \text{ yrs.}$	=15.09 yrs.
Total				=89.351 yrs. =89 ^{yr} -4 ^m -6 ^d

Corrections :

Reduction or haran in ayu is due to :

1. Chakra path Haran.
2. Astangat Haran.
3. Shatrushketa Haran
4. Krurodaya Haran.

Haran Sanskar for Indira Gandhi 1/2

Planet	Years	Chakra Path Haran(1)	Astangat Haran(2)	Shatrukshetra Haran(3)	Years after Haran
Sun	10.773	-	.	-	10.773 yrs.
Moon	16.848	Placed in 7H. So 1/12 is lost = 15.444 yrs	.	-	15.444 yrs.

Venus	15.4	-	-	-	15.4 yrs.
Saturn	15.09	-	-	loses 1/3, so gets=10.06 yrs	10.06 yrs.

Total 74.6585 yrs

Krurodaya Haran for Saturn - 2.8965 yrs*

years after Krurodaya Haran=71.7620 yrs.

Haran Sanskar for Indira Gandhi 2/2

Krurodaya Haran for Saturn –

Saturn is placed in Lagna and therefore will undergo Krurodaya Haran.

- a. Convert lagna degree, minus the signs into minutes:

$$\text{Lagna} - 3s\ 27^{\circ}\ 56' = 27^{\circ}\ 56' = 1676'$$

- b. Ayu provided by planets after shatru kshetra haran X Minutes of Ascendant

$$216000' (360^{\circ})$$

$$= \frac{74.6585 \times 1676}{21600} = 5.7929 \text{ yrs}$$

- c. Since Saturn is aspected by a benefic moon he will lose 1/2 these years i.e. 2.8965 in krurodaya haran.

To the Ayu obtained after Haran, Lagna ayu will have to be added.

Lagna Ayu

LagnaAyu

1. Note the longitude of Lagna in signs, degrees and minutes. Ignore the signs and convert the degrees into minutes.
2. Lagna gives a term of life in years equal to the navamsas passed in lagna.
3. Because 1 Navamsa is $3^{\circ}20'$ (200'), divide the minutes of lagna by 200 to get the years and months provided by Lagna.
4. Lagna is $3^{\circ} 27^{\circ} 56'$
Ignore 3s, and convert $27^{\circ} 56'$ into minutes = 1676'
 $\frac{1676'}{200'} = 8.38$ years = Provided by Lagna or Lagnaayu

Final Pindayu of Indira Gandhi

Pindayu

Years obtained after Haran = 71.7620 yrs.

Lagna Ayu = + 8.38 yrs.

Total Ayu = 80.1420 Savan Years (1 savan yr = 360 days, 1 solar yr = 365 days)

Convert into Solar years = $\frac{80.142 \times 360}{365}$

= 79.044 yrs (solar) Final Pindayu = 79 yrs - 0 month - 16 days

Amsayu

Amsayu is another very important method for calculation of longevity. It is followed when lagna is very strong.

The Procedure

1. Convert the full Nirayana longitude of the planets and lagna into minutes.
2. Divide each of them by 200. (1 navamsa)
3. If the quotient is more than 12, then subtract multiples of 12 from it. The remainder is the age provided by the planets and lagna. If quotient is 12 then take it as 12.
4. Carry out Bharan Sanskar (Addition)
5. Carry out the Haran Sanskar (reductions) like in Pindayu except Krurodaya Haran, which will not be applied.

Bharan Sanskar

Bharan Sanskar

1. If the planet is exalted or retrograde, multiply the age provided by the planet by 3.
2. If the planet is vargottam, in own Sign, or in own navamsa or in own drekkna, double the age. i.e. multiply by 2.
3. If a planet is exalted and vargottam then double the years only once.
4. If the planet is retrograde and vargottam, then multiply by 3 only once.

Amsayu- Indira Gandhi

Planet	Longitude	Converted into degrees	minutes	Divided by 200' and the remainder left	Ayu provided by the planet
1. Sun	7°4°07'	214°07'	12847'	$\frac{12847}{200} = 4.23 \text{ yrs}$	4 ^{yr} , 2 ^m , 23 ^d
2. Moon	9°5°37'	275°37'	16537'	$\frac{16537}{200} = 10.68 \text{ yrs}$	10 ^{yr} , 8 ^m , 5 ^d
3. Mars	4°16°22'	136°22'	8182'	$\frac{8182}{200} = 4.91 \text{ yrs}$	4 ^{yr} , 10 ^m , 27 ^d
4. Mercury	7°13°14'	223°14'	13394'	$\frac{13394}{200} = 6.97 \text{ yrs}$	6 ^{yr} , 11 ^m , 19 ^d
5. Jupiter	1°15°	45°	2700'	$\frac{2700}{200} = 1.5 \text{ yrs}$	1 ^{yr} , 6 ^m
6. Venus	8°21°	261°	15660'	$\frac{15660}{200} = 6.3 \text{ yrs}$	6 ^{yr} , 3 ^m , 18 ^d
7. Saturn	3°21°47'	111°47'	6707'	$\frac{6707}{200} = 9.53 \text{ yrs}$	9 ^{yr} , 6 ^m , 11 ^d
8. Lagna	3°27°56'	117°56'	7076'	$\frac{7076}{200} = 11.38 \text{ yrs}$	11 ^{yr} , 4 ^m , 17 ^d
				Total =	55^{yrs}, 6^{mon}

Eg Sun

Step 1

$$\begin{array}{r}
 200 \overline{) 12847} \quad 64.235 \\
 \underline{-1200} \\
 847 \\
 \underline{-800} \\
 470 \\
 \underline{-400} \\
 700 \\
 \underline{-600} \\
 1000 \\
 \underline{-1000} \\
 =0
 \end{array}$$

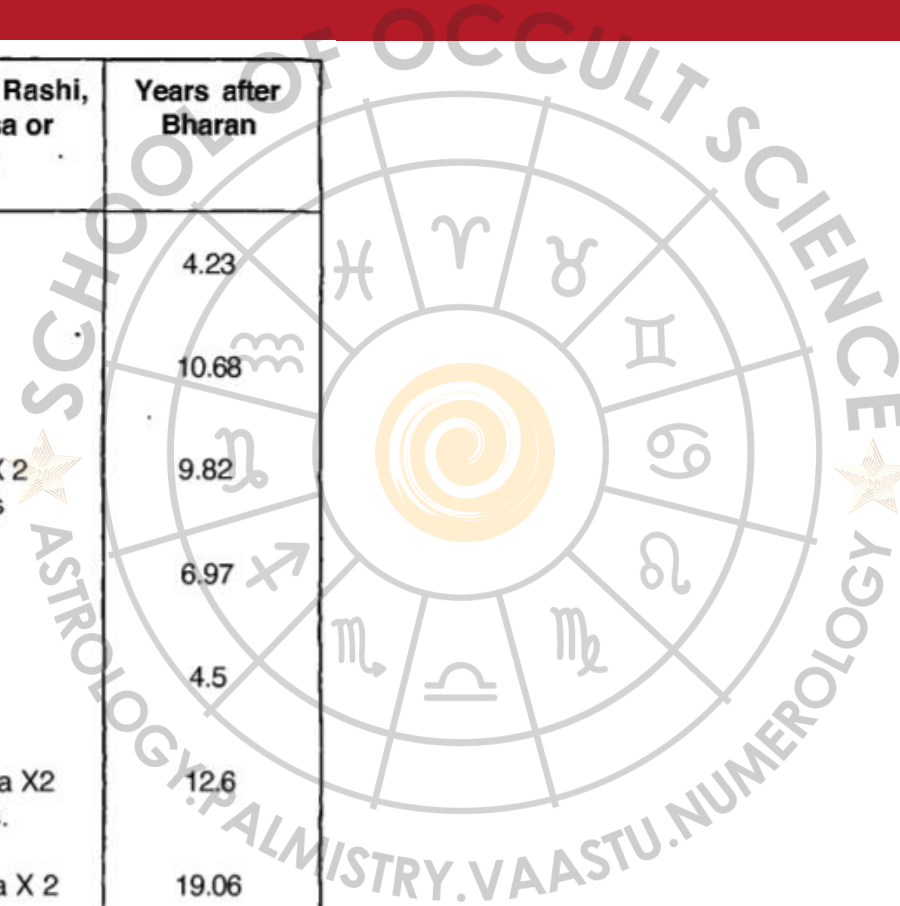

Step 2

$$\begin{array}{r}
 12 \overline{) 64.235} \quad 5 \\
 \underline{-60} \\
 4.235
 \end{array}$$

So, remainder = 4.23 yrs

Bharan Sanskar for Indira Gandhi

Planet	Years Contributed	Exalted/ Retrograde	Vargottam own Rashi, own Navamsa or Drekna	Years after Bharan
1. Sun	4.23	-	-	4.23
2. Moon	10.68	-	-	10.68
3. Mars	4.91	-	Vargottam X 2 = 9.82 yrs	9.82
4. Mercury	6.97	-	-	6.97
5. Jupiter	1.5	x 3 = 4.5 yrs	-	4.5
6. Venus	6.3	-	Own Navamsa X 2 = 12.6 yrs.	12.6
7. Saturn	9.53	-	Own Navamsa X 2 = 19.06 yrs.	19.06
8. Lagna	11.38	-	-	11.38
Total	55.5 yrs Before Bharan		Total	79.24 After Bharan

Haran Sanskar

Planet	Years	Chakra Path Haran	Astangat Haran	Shatukshetra Haran	Years after Haran
Sun	4.23	-	-	-	4.23
Moon	10.68	Placed in 7H So 1/12 loses = 9.79 yrs	-	-	9.79
Mars	9.82	-	-	-	9.82
Mercury	6.97	-	loses 1/2 = 3.485	-	3.485
Jupiter	4.5	Placed in 11H So 1/4 lost = 3.375 Yrs	-	-	3.375
Venus	12.6	-	-	-	12.6
Saturn	19.6	-	-	loses 1/3 so gets = 13.07 yrs	13.07
Lagna	11.38	-	-	-	11.38
Total	79.24 yrs Before Haran			Total	67.749 After Haran

= 67 years 9 months

Amsayu = 67 years 9 months – Most Accurate

Nisargayu

This method cannot be applied to all cases. According to Kalyana Vanna (Saravali) and Manitha, Nisargayu can be applied to those horoscopes in which Moon is the strongest. Nisargayu method is exactly like Pindayu method. The only difference is that the planets give different years at their highest exaltation degrees.

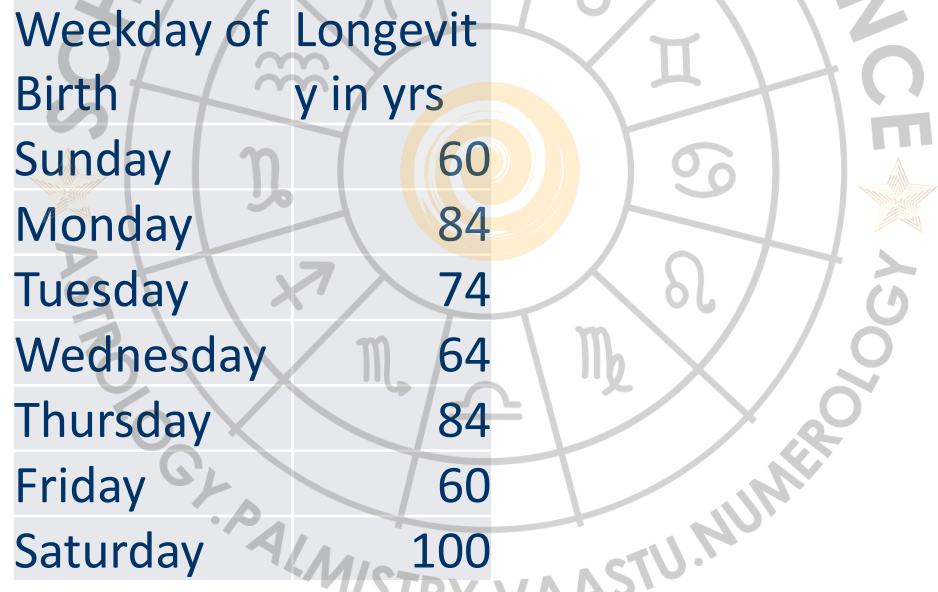

Sun	20
Moon	1
Mars	2
Mercury	9
Jupiter	8
Venus	20
Saturn	50

This method cannot be applied to Indira Gandhi's case because Moon is not the strongest planet among the Lagna- Sun-and Moon. I

Other Methods of Determining Longevity - Varayu

Varayu –

Mansagari has given longevity according to the weekday of birth. This method is not found to be very accurate.

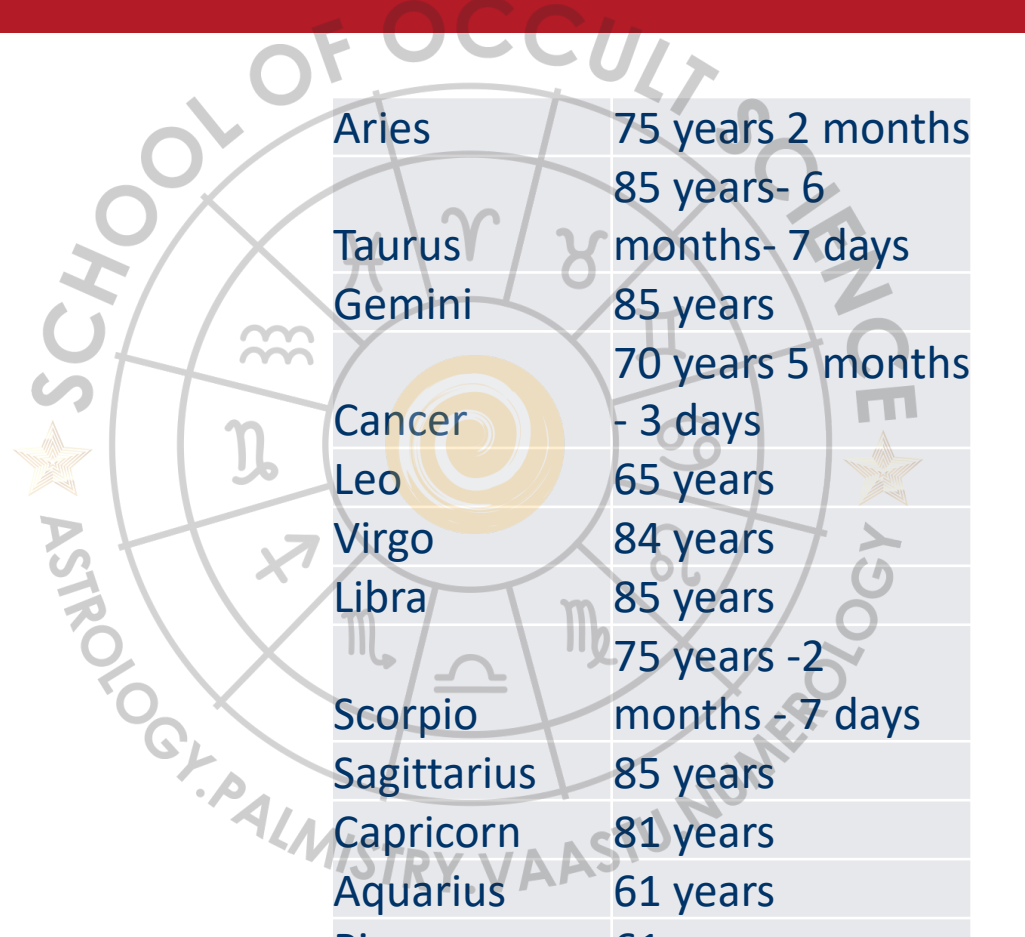

Weekday of Birth	Longevity in yrs
Sunday	60
Monday	84
Tuesday	74
Wednesday	64
Thursday	84
Friday	60
Saturday	100

Taking our previous example of Smt. Indira Gandhi- She was born on Monday. According to Varayu method, a person who is born on Monday lives for 84 years, so her longevity should have been 84 yrs.

Rashyayu

Mansagari also gives Rashyayu for birth in different Rashis (Moon signs).

According to Rashyayu method Smt Indira Gandhi's longevity should have been 81 years. She had Capricorn Rashi.

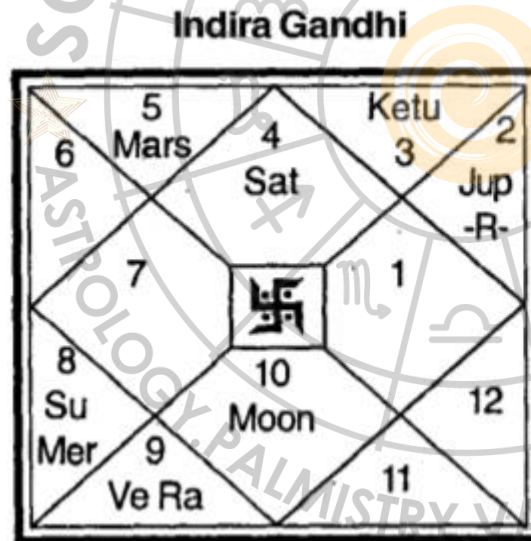

Aries	75 years 2 months
Taurus	85 years- 6
Gemini	months- 7 days
Cancer	85 years
Leo	70 years 5 months
Virgo	- 3 days
Libra	65 years
Scorpio	84 years
Sagittarius	85 years
Capricorn	75 years -2
Aquarius	months -7 days
Pisces	85 years
	81 years
	61 years
	61 years

Rashi Dhruvanka Method

Rashi Mana has been fixed for each rashi. This is as follows:

Dhruvanka of each planet will be the same as the 'mana' of the rashi in which he is placed. The Sum total of the Dhruvanka of all the planets will show the longevity.

Aries	10
Taurus	6
Gemini	20
Cancer	5
Leo	8
Virgo	2
Libra	20
Scorpio	6
Sagittarius	10
Capricorn	14
Aquarius	3
Pisces	4

Planet	Rashi	Dhruvanka
Sun	Scorpio	6
Moon	Capricorn	14
Mars	Leo	8
Mercury	Scorpio	6
Jupiter	Taurus	6
Venus	Sagittarius	10
Saturn	Cancer	5
Rahu	Sagittarius	10
Ketu	Gemini	20
Total		85

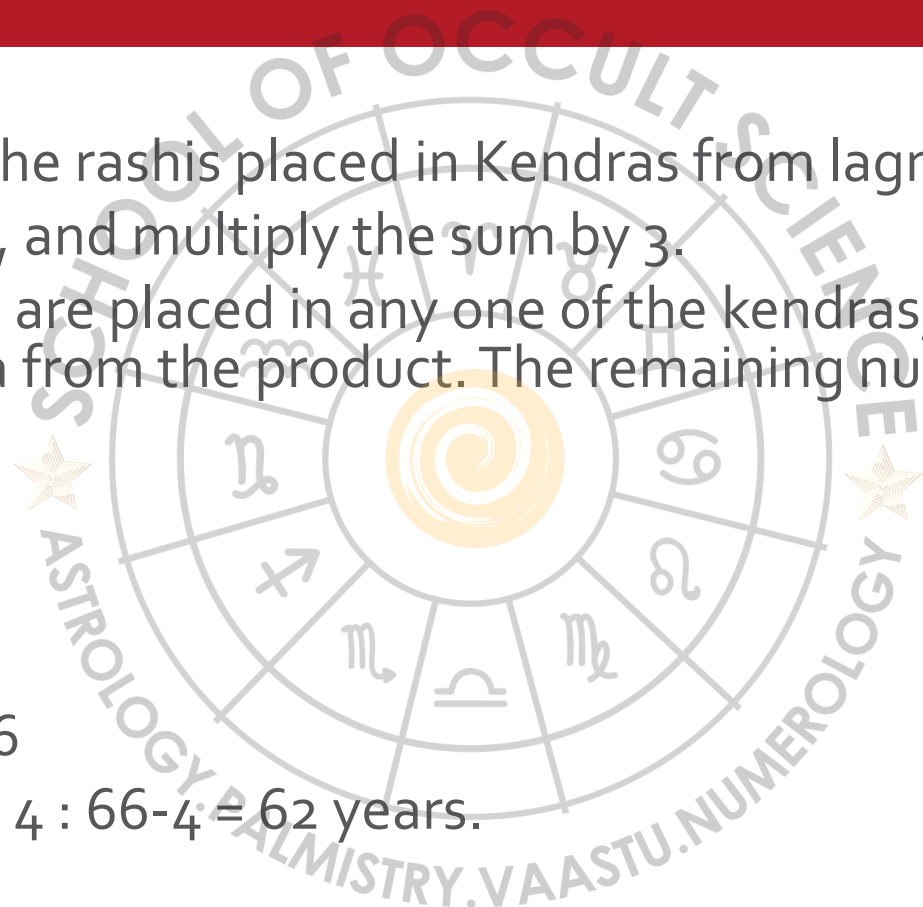

The Sum total of Dhruvanka of all the planets is 85. Her age should have been 85 according to this method.

Kendrayu

1. Note the numbers of the rashis placed in Kendras from lagna.
2. Add the four numbers, and multiply the sum by 3.
3. If Saturn Mars or Rahu are placed in any one of the kendras, then reduce the number of that kendra from the product. The remaining number will be the ayu.

Indira Gandhi

1. Kendras : 4, 7, 10, 1
2. Add : $4 + 7 + 10 + 1 = 22$
Multiply by 3 : $22 \times 3 = 66$
Saturn is in Lagna so reduce 4 : $66 - 4 = 62$ years.

Ayu Nirnay - Conclusion

After applying all these different methods of longevity determination, it appears that **Jaimini Ayurdaya, Pindayu and Amsayu** methods give more accurate results. In Indira Gandhi's horoscope, Amsayu method has given the most accurate result and Jaimini method has also been quite accurate where Ayu khanda is concerned.

Indira Gandhi's Longevity According to Different Methods
At the time of her assassination she was almost 67 years.

	Jaimini	
1	Ayurdaya	Madhya -Ayu 79 yrs , 0 months , 16 days.
2	Pindayu	
3	Amsayu	67 yrs, 9 months.
4	Nisargayu	Not Applicabl
	Other Methods	
5	Varayu	84 years
6	Rashyayu	81 years
	Rashi Dhruvanka	
7	method	85 years
8	Kendrayu	62 years
