Medical Astrology – Lung Diseases

Position of Lungs with respect to other organs

Lung Diseases

- Doctors may classify lung conditions as obstructive lung disease or restrictive lung disease. Obstructive lung diseases include conditions that make it hard to exhale all the air in the lungs. People with restrictive lung disease have difficulty fully expanding their lungs with air. ★
- Obstructive and restrictive lung disease share the same main symptom: shortness of breath with exertion. ★

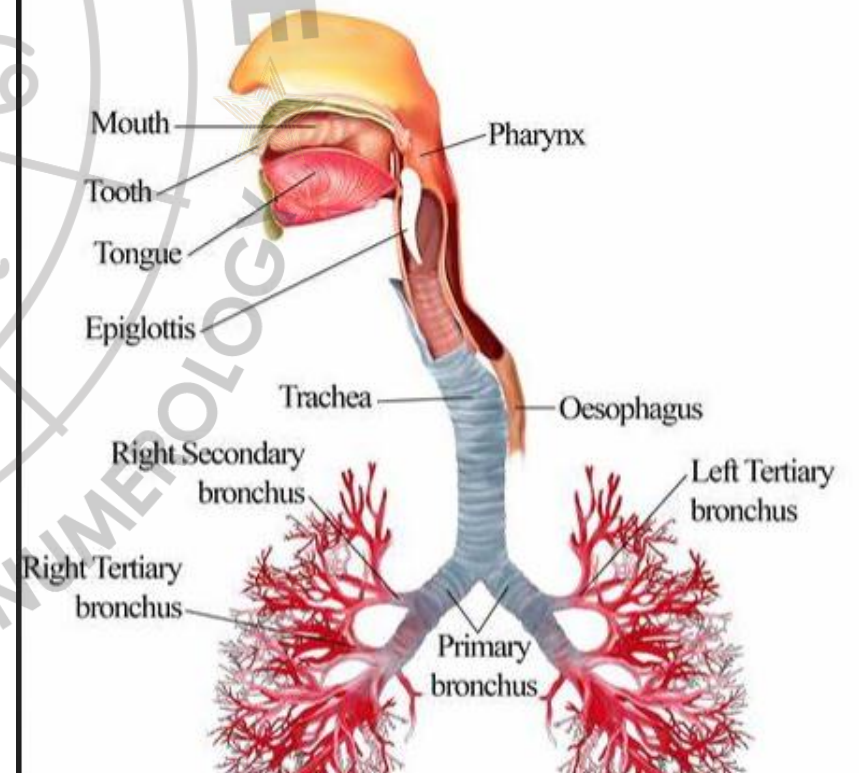

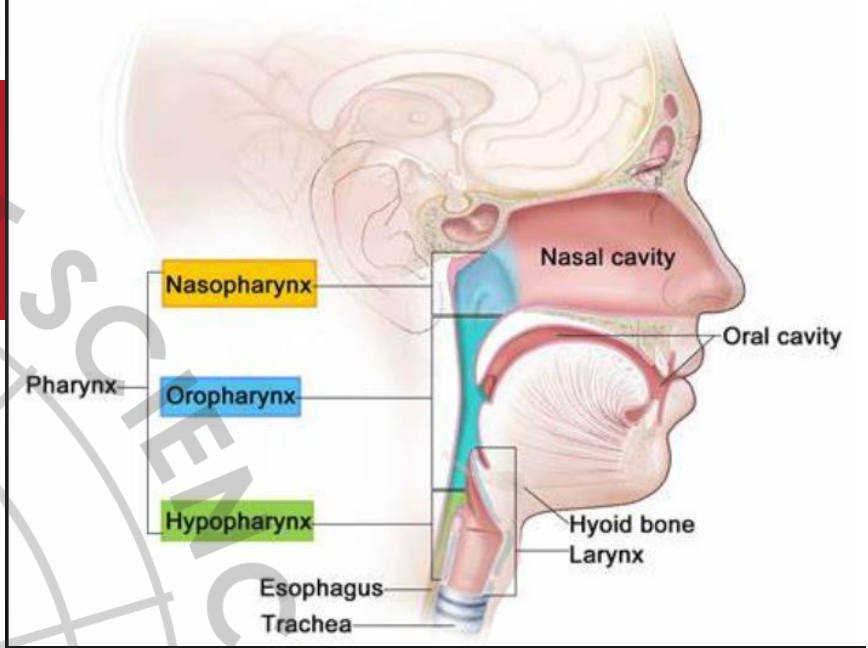

Lungs and Respiratory System

The **function** of the human **respiratory system** is to transport air into the lungs and to facilitate the diffusion of Oxygen into the blood stream (which we need for our cells to live and function properly). It also receives waste Carbon Dioxide from the blood and exhales it.

Anatomy of the Respiratory System

Nose and Nasal Cavity. The nose and nasal cavity form the main external opening for the respiratory system and are the first section of the body's airway—the respiratory tract through which air moves

- Mouth.
 - Pharynx
 - Larynx
 - Trachea
 - Bronchi and Bronchioles
 - Lungs
- Muscles of Respiration
 - Cells -Epithelial cells -Nerve cells - Muscle cells
 - Tissues – -Epithelial tissues -Nerve tissues -Muscle tissues -Connective tissues

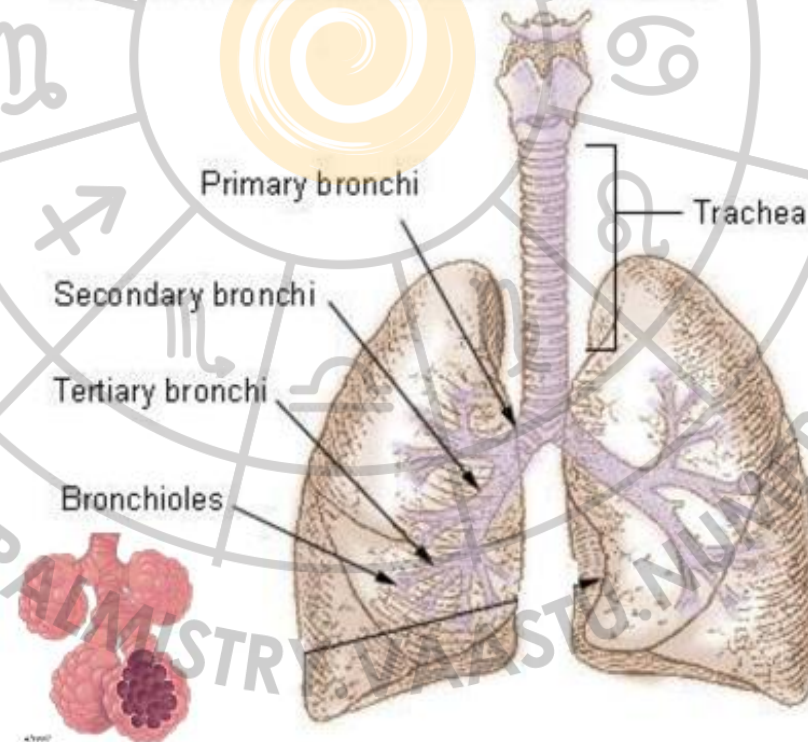

Bronchi and Bronchioles

Definition: Bronchi and Bronchioles

THINK OF IT LIKE A TREE...

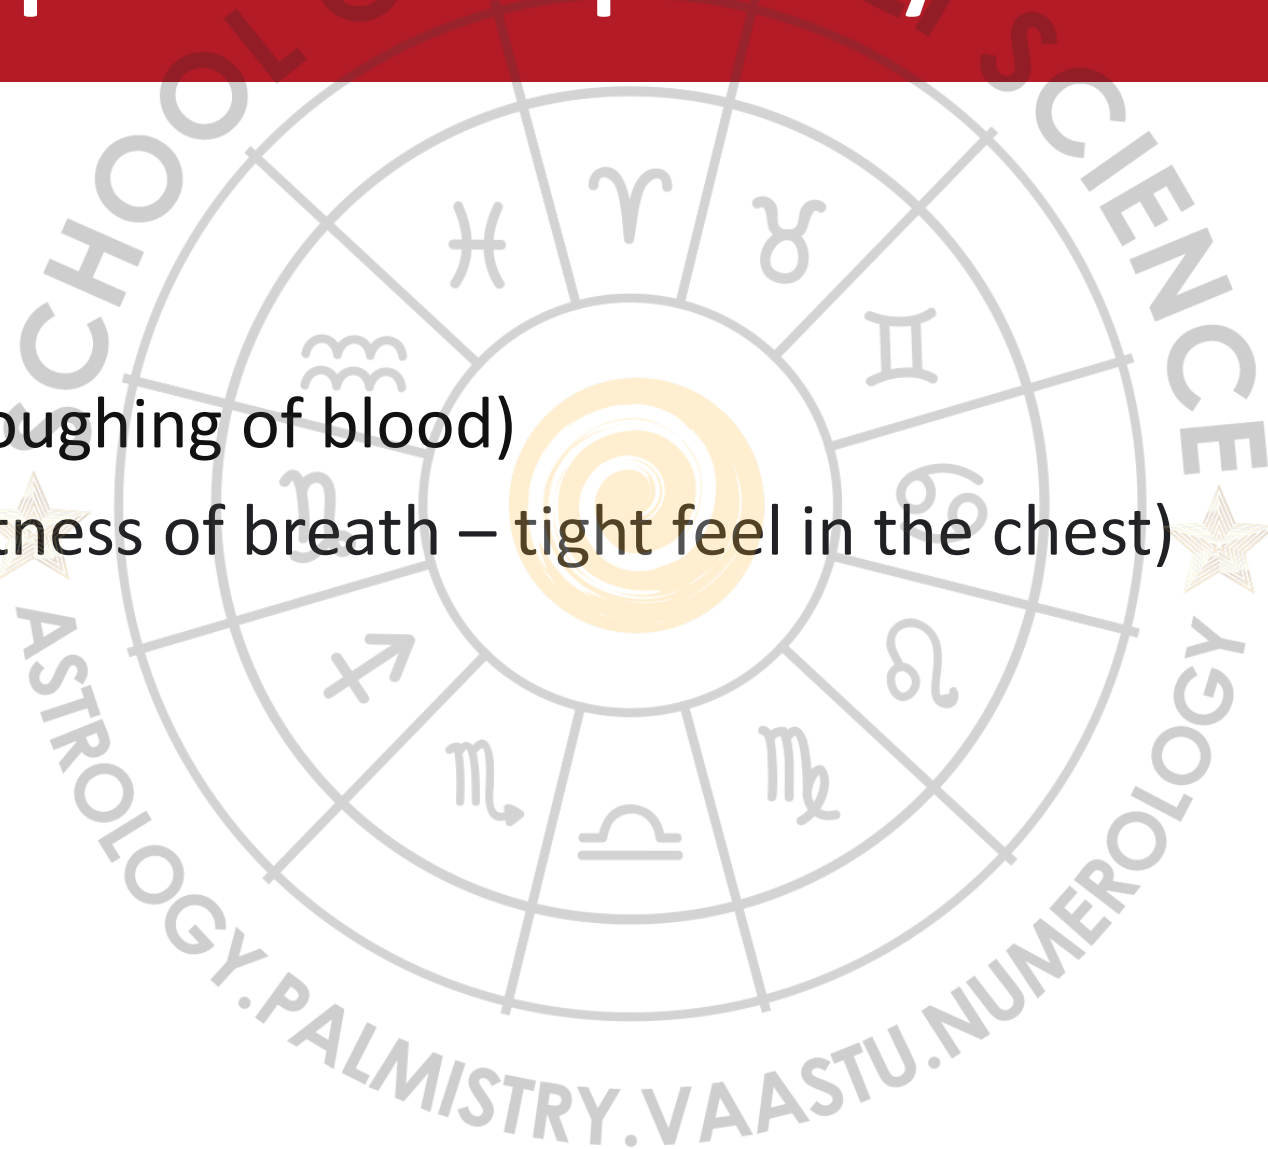

- Trachea- the passage for air to the lungs (the trunk)
- Bronchus- **Branches** off the trachea (also called primary bronchi)
- Bronchi- the two smaller subdivisions of the bronchus (**smaller branches**)
- Bronchioles- the even smaller subdivisions of the bronchi (**even smaller branches**)
- Alveoli- gas exchange units (**leaves**)

Bronchi, Bronchial Tree, and Lungs

Signs and Symptoms of Respiratory Diseases

- Cough
- Sputum
- Hemoptysis (coughing of blood)
- Dyspnea (shortness of breath – tight feel in the chest)
- Wheezes
- Chest pain

Diseases

The most common causes of obstructive lung disease are:

- Asthma. This chronic respiratory condition is caused by consistent inflammation of the airways. ... Asthma is a **condition in which your airways narrow and swell and may produce extra mucus.**
- COPD Chronic obstructive pulmonary disease (COPD) is a **chronic inflammatory lung disease** that causes obstructed airflow from the lungs. Symptoms include breathing difficulty, cough, mucus (sputum) production and wheezing.

Bronchitis, Emphysema., Lung Cancer. ...Emphysema and chronic bronchitis are the two most common conditions that contribute to COPD. These two conditions usually occur together and can vary in severity among individuals with COPD.

Bronchitis and Emphysema

Bronchitis is an inflammation of the lining of your bronchial tubes, which carry air to and from your lungs. People who have bronchitis often cough up thickened mucus, which can be discolored. Bronchitis may be either acute or chronic.

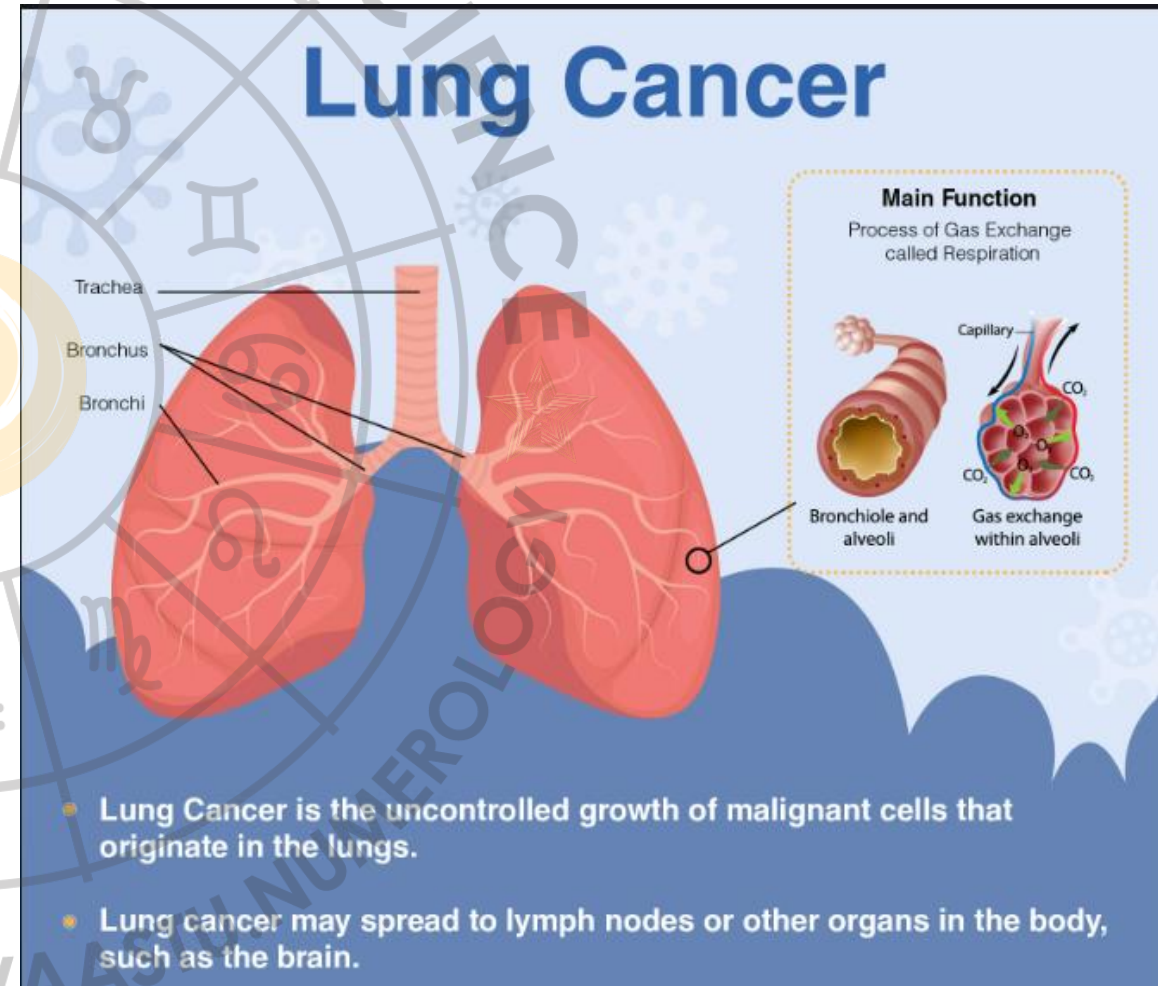

Emphysema is a lung condition that causes shortness of breath. In people with emphysema, the air sacs in the lungs (alveoli) are damaged. Over time, the inner walls of the air sacs weaken and rupture — creating larger air spaces instead of many small ones. This reduces the surface area of the lungs and, in turn, the amount of oxygen that reaches your bloodstream. When you exhale, the damaged alveoli don't work properly and old air becomes trapped, leaving no room for fresh, oxygen-rich air to enter.

Most people with emphysema also have chronic bronchitis. **Chronic bronchitis** is inflammation of the tubes that carry air to your lungs (bronchial tubes), which leads to a persistent cough.

Emphysema and chronic bronchitis are two conditions that make up **chronic obstructive pulmonary disease (COPD)**.

Lung Cancer

Lung cancer, also known as **lung carcinoma** is a malignant lung tumor characterized by uncontrolled cell growth in tissues of the lung.

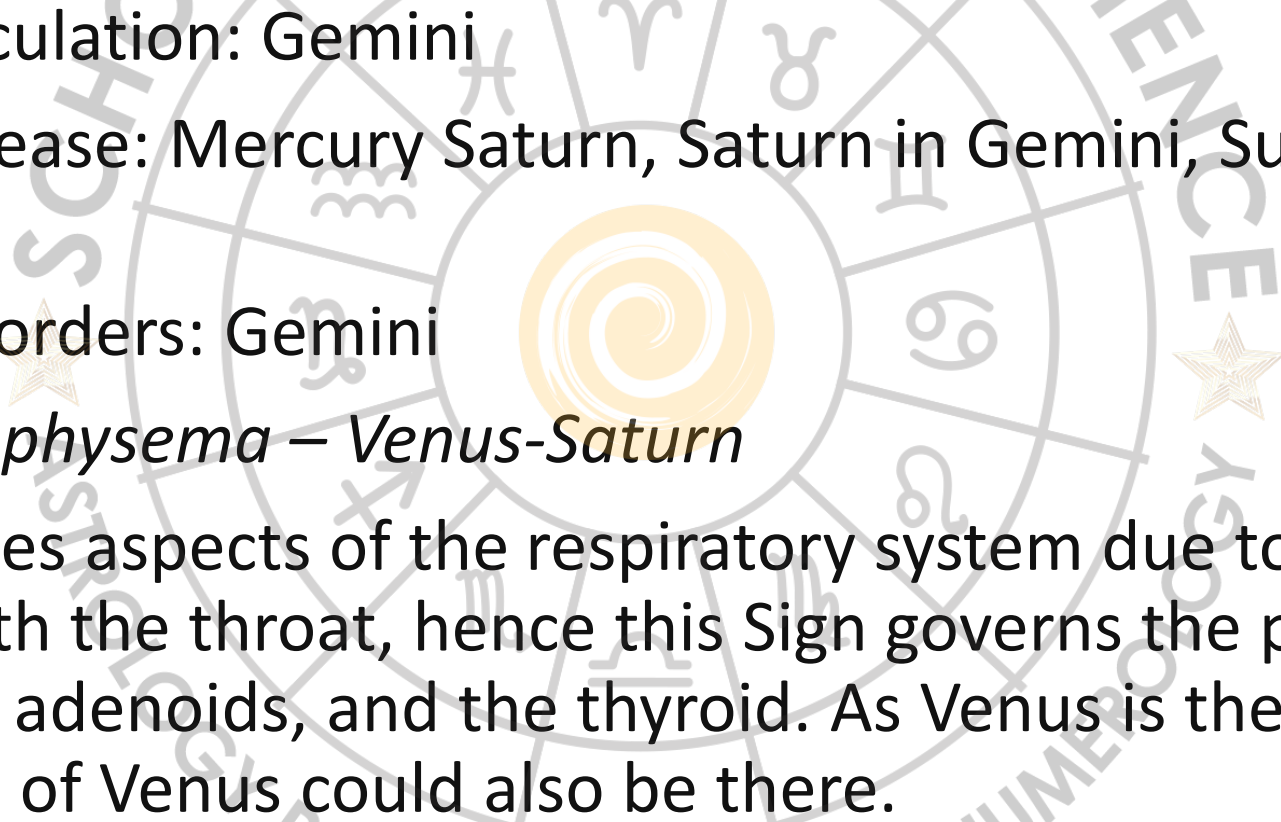

Disorders

Disorders of the respiratory system can be classified into several general groups:

- **Airway** obstructive conditions (e.g., emphysema, bronchitis, asthma)
- **Pulmonary** (artery connected with lungs) restrictive conditions (e.g., fibrosis, sarcoidosis, alveolar damage, pleural effusion)
- **Vascular** diseases (e.g., pulmonary edema, pulmonary embolism, pulmonary hypertension) (The vascular system, also called **the circulatory system**, is made up of the vessels that carry blood and lymph through the body.)
- **Infectious, environmental and other “diseases”** (e.g., pneumonia, tuberculosis, asbestosis, particulate pollutants)
- **Primary cancers** (e.g. bronchial carcinoma, mesothelioma)
- **Secondary cancers** (e.g. cancers that originated elsewhere in the body, but have seeded themselves in the lungs)
- **Insufficient surfactant** (e.g. respiratory distress syndrome in pre-term babies) .Disorders of the respiratory system are usually treated by a pulmonologist and respiratory therapist.

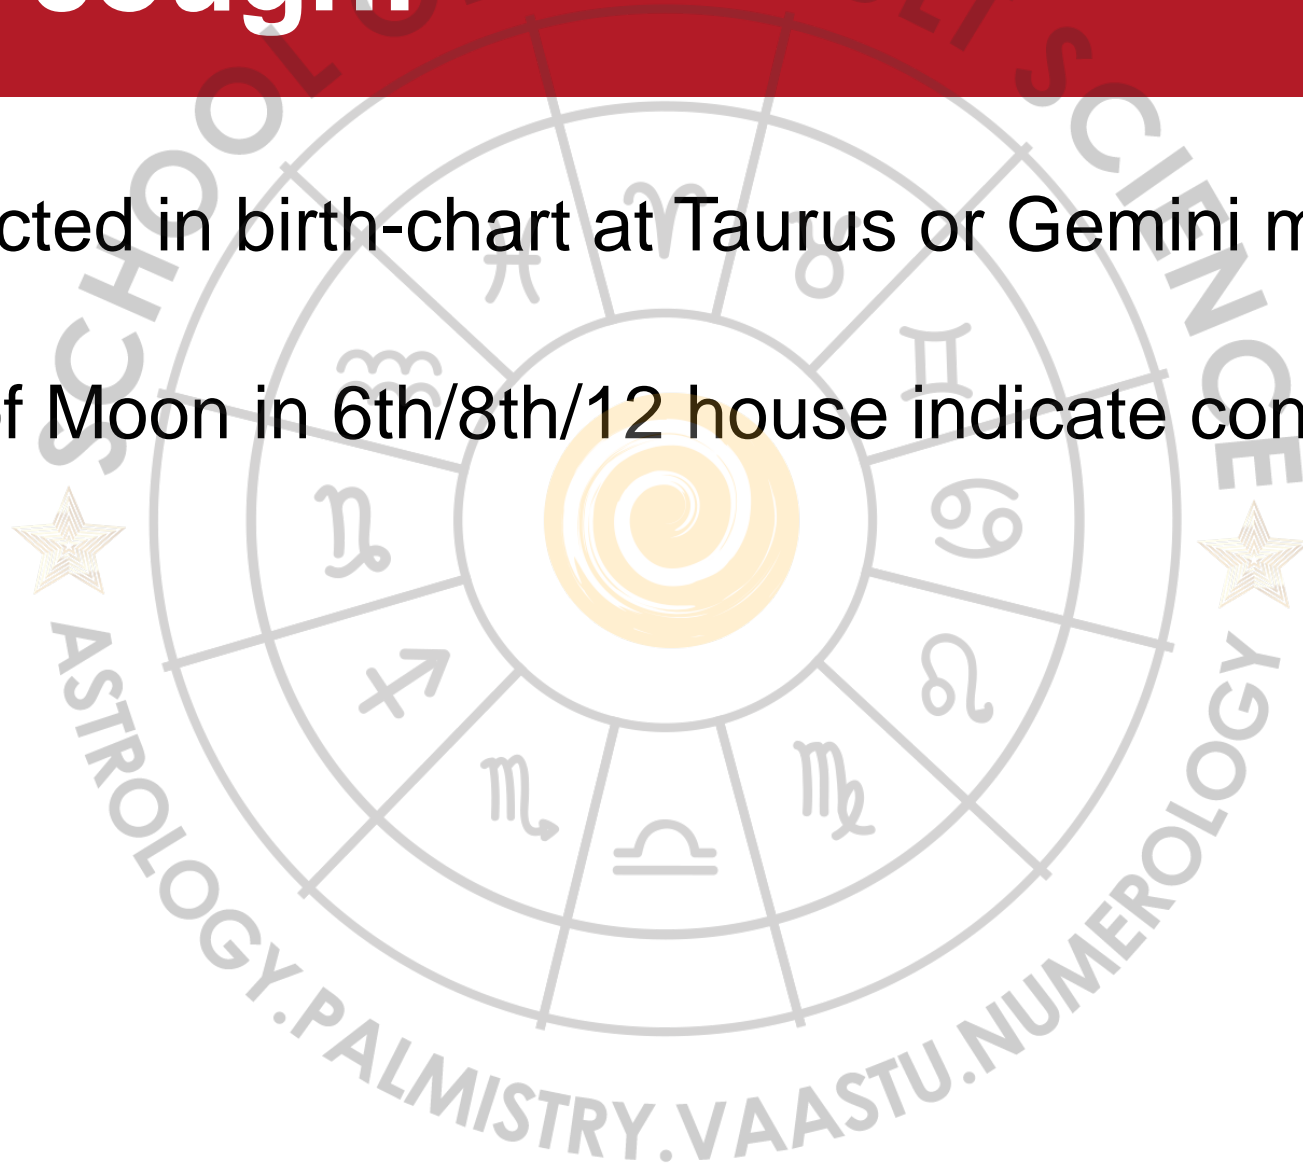

Astrological Significators related to Breathing Problems

- Breathing – Gemini, Mercury, Rahu; Airy Signs and Mutability (Dual signs)
- Gemini / Cancer 3rd and 4th H **lungs, bronchial tubes, diaphragm** (partly by Cancer and Leo), Inhaled breath and oxygenation of the body through breathing
- Respiratory Allergies – Mutability, Prominently Moon; Cancer, Gemini, Mercury (Budh)
- Respiratory Disorders – Mutability, Gemini, Mercury, Moon-Mercury, Moon-Saturn, Third House, Saturn in 3rd House
- The tubes of the lungs (known as the bronchial tubes or the bronchi) and Trachea – Gemini
- Lungs – Gemini; (3rd / 4th houses for lower lungs) – Leo for base of lungs and pulmonary diaphragm (except the portion arising from lumbar vertebrac – ruled by Libra)
- Upper Respiratory System (Pharynx, Larynx and Trachea) – Gemini
- Pulmonary Artery – Leo (their lining under Cancer)

- 
- *Pulmonary* circulation: Gemini
 - *Pulmonary* disease: Mercury Saturn, Saturn in Gemini, Sun, Jupiter/Saturn
 - *Pulmonary* disorders: Gemini
 - *Pulmonary emphysema* – Venus-Saturn
 - Taurus also rules aspects of the respiratory system due to the association with the throat, hence this Sign governs the pharynx, larynx, tonsils, adenoids, and the thyroid. As Venus is the ruler of Taurus, so role of Venus could also be there.

Whooping cough:

- Mercury afflicted in birth-chart at Taurus or Gemini may cause this trouble.
- Placement of Moon in 6th/8th/12 house indicate contagious cold and cough.

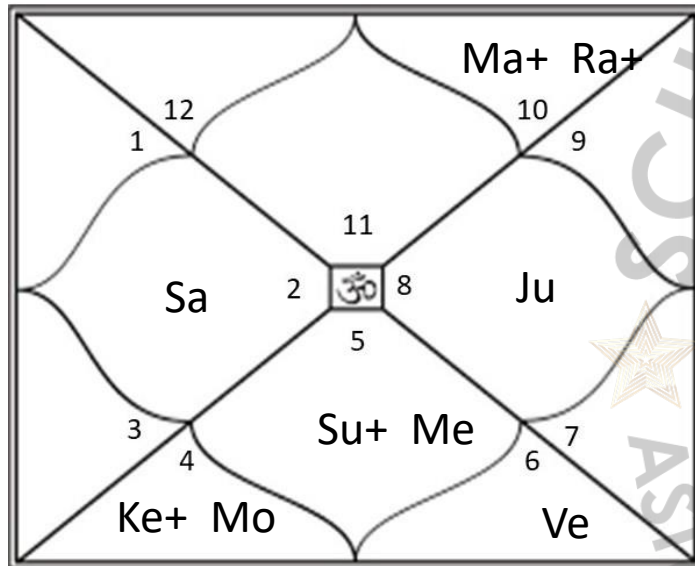

Lung Disease -1- Asthma

DOB : 15.09.1971

TOB : 17:15 hrs

POB : Bhatinda (Punjab)

Lag : 01°19' Sun : 28°31' Mo : 12°47'
Ma: 18°40' Me: 11°13' Jup: 07°05'
Ve : 03°36' Sa: 13°06' Ra: 18°51'

- She suffered from Asthma since childhood. Sa-Ma ; Sa-Ra
- Her 4th lord is debilitated in the 8th house.
- Moon is highly afflicted by Saturn, Mars and Ketu; but aspect of Jupiter on Moon at least did not put her in bed.
- In spite of poor health she received sound education, MA; 5th lord in kendra.
- If the dispositor of the lord of Lagna is posited in the trika houses (6/8/12), the native has a weak constitution. Her dispositor of Lagnesh is debilitated in the 8th house, providing her an ailing physique since childhood.
- Her Sun is afflicted by Ma and 8th lord Me.
- 4th H also has Saturn which is karak for obstruction and is significator of Vat (air / gas) related diseases.
- Cancer zodiac is also highly afflicted by RKA and exalted Ma.
- Her afflicted Moon, Sun, 4th H, 4th lord, Cancer generated asthma in the body.
- When the Moon is in association with a malefic is posited in the 6th house, it is an indication of poor health. So she suffered .
- She developed asthma during childhood. She was born in Saturn – Mars dasha. Saturn sitting in 4th house with dispositor in 8th and Mars aspecting Mo and Sun gave problems at birth .

64th Nav lord : Sa

22nd Drek lord : Me

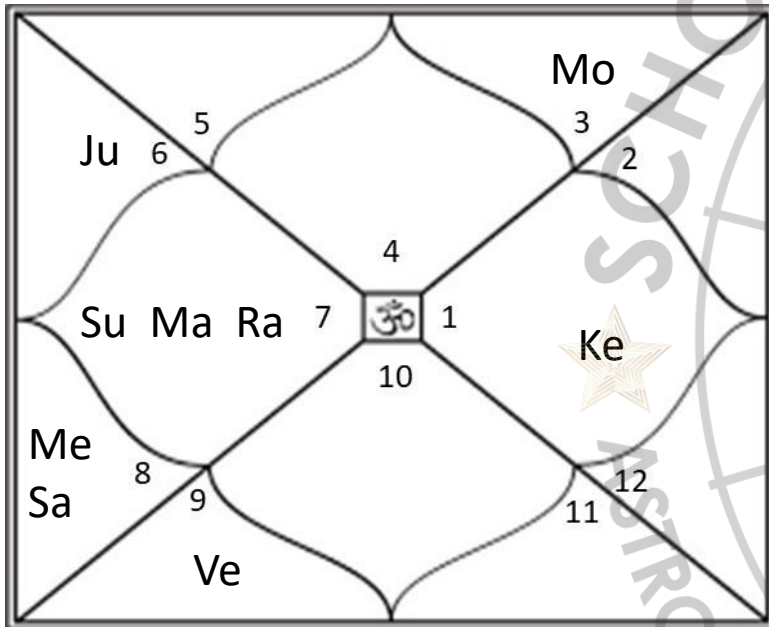

Sarp Drek : Ke, Mo, Ju

Lung Disease -2- Asthma

DOB : 10.11.1957

TOB : 22:35 hrs

POB : Gorakhpur(U.P.)

Lag : 10°09' Sun : 24°46' Mo : 01°35'
Ma: 07°58' Me: 05°09' Jup: 26°32'
Ve : 11°44' Sa: 20°12 Ra: 16°49'

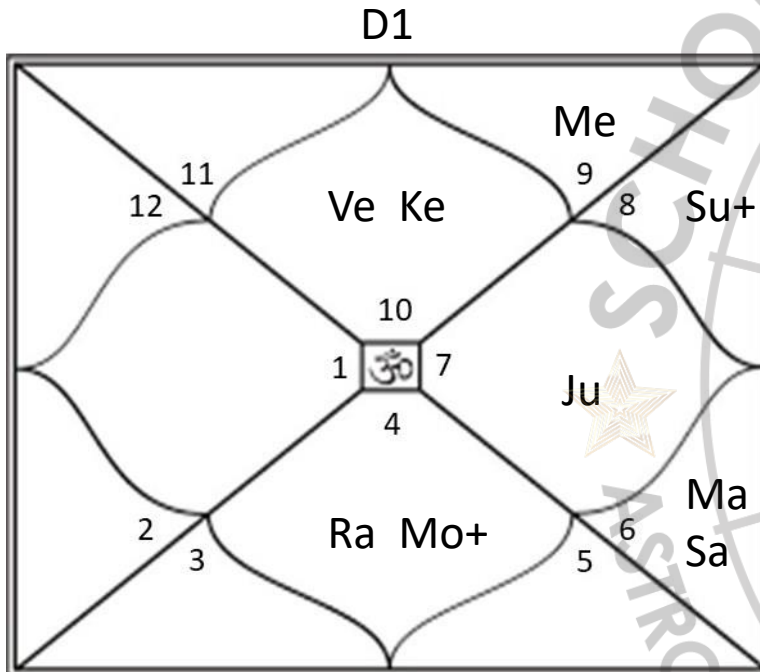

- She was born in Ma-Me dasha period and suffered from Asthma immensely during Mars and Rahu Mahadasas upto Sep, 1978.
- Commencement of Jupiter Mahadasa, cured her completely.
- Her ascendant is Cancer – a watery sign. Ascendant lord Moon has gone into 12th indicating some health problem at birth.
- 4th house denoting chest area is badly afflicted by Sun, Rahu and Mars.
- 4th lord is posited in 6th H of disease; however there are no bad afflictions.
- At birth Ma-Me dasha was running. This activated 5th H where Mercury is placed (lord of 3rd). Mercury is afflicted by Saturn. 3rd H is afflicted by 6th lord Jupiter. Hence both 3rd and 4th house are afflicted.
- Affliction of 4th H by Ra creates problems in breathing. Affliction of Me by Saturn indicates blockages in air passage.
- After Ma MD, Ra MD came which is also afflicting 4th H as well as significator of health Sun. During Rahu MD again Venus – 4th lord is dispositor sitting in 6th H. So the disease continued.
- During Ju MD it is lord of 6th H and posited in 3rd so for some time effects must have been there but gradually recovery happened as Jupiter is also 9th lord, influence of benefic planet and there is no connection with lagna lord.

Lung Disease -3- Asthma

DOB : 15.12.1981

TOB : 09:20 hrs

POB : Roorkee

Lag : 00°39' Sun : 29°29' Mo : 21°37'
 Ma: 06°00' Me: 02°01' Jup: 09°46'
 Ve : 10°19' Sa: 26°45' Ra: 00°28'

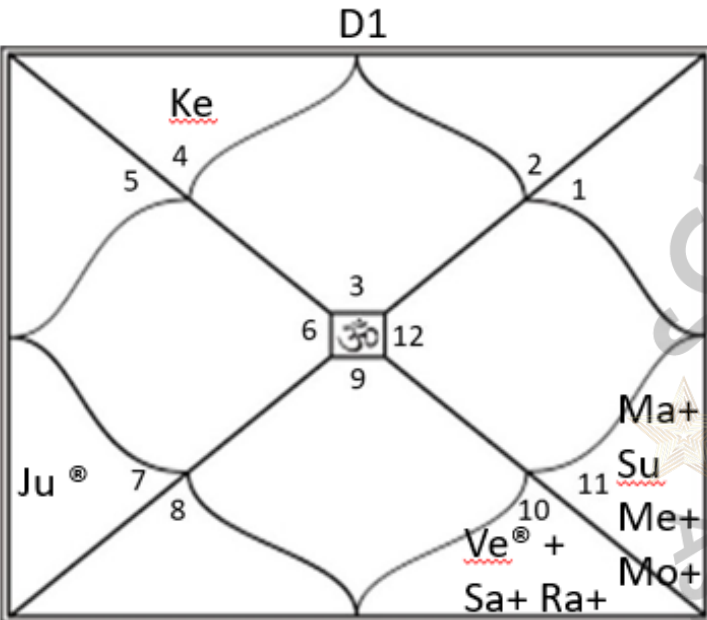

- He developed Asthma during childhood; had worst during 1994-97(Ke-Su/Ma).
- 4th lord in an inimical sign, afflicted with Saturn. 4th H being aspected by 12th lord Jupiter which is also 3rd lord and akarak for this chart.
- Significator of breathing Me is aspected by Ma and is placed in Ketu's nakshatra giving it malefic in nature. Me is also 6th lord from ascendant.
- 4th lord Ma is conjunct with lagna lord and aspecting 6th lord as well as significator of breathing Me. This makes connection between lagna, 4th lord, 6th lord and significator of breathing. Even Gemini (6th H) is being aspected by Saturn denoting obstruction in breathing.
- If we consider body as a whole, significator of body Sun is giving results of 12th in chalit. Lagna is badly afflicted by RKA. Moon is also afflicted by RKA and giving results of 8th H.
- During Ketu MD, its dispositor being Saturn (lagna lord) and because Ketu is posited in lagna therefore lagna gets activated, Saturn's aspect on Gemini, influence on 4th lord Ma gets activated resulting in Asthma symptoms surfacing on the native. Sun's AD gave results of 12th, Mo is also afflicted, Finally Ma AD must have been worst.
- Dispositor of lagna lord Me placed in trik house also shows bad health of the native .

Lung Disease -4- Asthma

DOB : 15.02.1934

TOB : 13:15 hrs

POB : Dhaka (Bangladesh)

- Mercury afflicted with Mars and Sun; Rahu afflicted with Saturn, Moon afflicted with Su and Ma; 4th house afflicted with Ma, 4th lord Sun (as per mid point of 4th in Leo) afflicted by Mars and Lagna being an airy sign made him prone to this dreadful disease throughout his life.
- 6th lord as per chalit is Venus aspecting 3rd H and cancer sign in chalit table.
- As per chalit Jupiter is the lord of 8th and 11th. So his birth was in Jupiter MDL and ADL which his 8th and 11th lord. This indicates congenital diseases. Jupiter is also aspected by Saturn. Saturn also aspecting 3rd and Cancer sign.

- He suffered from asthma, breathing trouble right from birth and never recovered from this disease.
- He was born in Ju-Ju-Sa.
- The dispositor of Lagnesh in is highly afflicted due to its closeness to malefic Rahu, compelled him to suffer physically throughout his life

Lung Disease -5- Asthma

DOB : 12.11.1971

TOB : 18:52 hrs

POB : Kota (Rajasthan)

Lag : 16°26' Sun : 26°02' Mo : 25°48'
Ma: 09°46' Me: 15°24' Jup: 17°50'
Ve : 15°56' Sa: 10°41' Ra: 15°46'

- Native faced acute asthmatic bronchitis between 1992 to 2006. This was between Ma-Sa and Ra-Ke
- 4th H afflicted by Ma. During MDL of Ma, 4th H affliction got activated. ADL Sa activated affliction on Me by Sa.
- 4th lord is debilitated.
- 3rd lord Moon is also afflicted by Ma. Problem continued throughout Ma balance dasha period.
- During Ra MD, again dispositor was Saturn hence Me affliction continued to remain activated. Ra-Sa, Ra-Me and Ra-Ke were all giving problems. (Ketu dispositor is Moon which is lord of 3rd and posited in 4th afflicted by Mars).
- Problems surfaced again during 2021-22. During 2021 native developed covid during April 19th 2021 to 9th May 2021 (Ju-Ke-Su/Mo). Covid affected lungs of the native. Thereafter from July 2022 (Ju-Ve-Su/Mo/Ma/Ra) asthma took over. Ma PDL started from 25th Oct. Native expected to get some relief Ra onwards when 4th house will not be involved, yet Me will remain afflicted by Sa as Ra dispositor is Sa. Also 6th lord Ve and 8th lord Ju (both ADL and MDL resp) are conjunct with Me. Hence problem will persist till April 2023.
